

Public First Poll for Onward Wind

Fieldwork: 30th Mar - 12th Apr 2023
Interview method: Online Survey
Population represented: GB Adults in rural areas
Sample size: 2029

Methodology:

All results are weighted using Iterative Proportional Fitting, or 'Raking'. The results are weighted by age and gender to be representative of rural areas

Public First is a member of the BPC and abides by its rules. For more information please contact the Public First Polling Team (polling@publicfirst.co.uk)

List of Tables

1	Which do you think are the most important issues facing the country at this time?Please tick up to three	5
2	How concerned, if at all, are you about climate change, sometimes referred to as 'global warming'?	8
3	How long have you lived in the area you currently live in?	11
4	How much would you estimate that the house you currently live in is worth, if it was put on the market today?	14
5	Do you agree or disagree with the following statements?: My local area needs new developments	17
6	Do you agree or disagree with the following statements?: New developments cause too much disruption to be worth doing	20
7	Which of the following, if any, have you personally done?Please select all that apply.	23
8	Which of the following comes closest to your view?	26
9	Which of the following comes closest to your view?	29
10	Would you support or oppose plans to build the following 3 miles from your home?: A new onshore wind farm	32
11	Would you support or oppose plans to build the following 3 miles from your home?: A new solar farm	35
12	Would you support or oppose plans to build the following 3 miles from your home?: New pylons and power lines for carrying electricity	38
13	Would you support or oppose plans to build the following 3 miles from your home?: New build homes	41
14	Would you support or oppose plans to build the following 3 miles from your home?: A new train station	44
15	Would you support or oppose plans to build the following in a location which was visible from your home through a window?: A new onshore wind farm	47
16	Would you support or oppose plans to build the following in a location which was visible from your home through a window?: A new solar farm	50
17	Would you support or oppose plans to build the following in a location which was visible from your home through a window?: New pylons and power lines for carrying electricity	53
18	Would you support or oppose plans to build the following in a location which was visible from your home through a window?: New build homes	56
19	Would you support or oppose plans to build the following in a location which was visible from your home through a window?: A new train station	59
20	Which of the following comes closest to your view?	62
21	What, if anything, do you think are benefits of building more renewable energy sources in the UK?Please select all that apply.	65
22	What, if anything, do you think are the negatives of building more renewable energy sources in the UK?Please select all that apply.	68
23	Rank Summary: Looking at the following, which do you think are the most persuasive reasons to be building more renewable energy sources?Please rank the following, with the most persuasive at the top, and the least persuasive at the bottom. (Ordered Left to Right by Rank)	71
24	Looking at the following, which do you think are the most persuasive reasons to be building more renewable energy sources?Please rank the following, with the most persuasive at the top, and the least persuasive at the bottom.: To make sure the UK's energy supply is secure, and we are not reliant on countries like Russia for our energy	72
25	Looking at the following, which do you think are the most persuasive reasons to be building more renewable energy sources?Please rank the following, with the most persuasive at the top, and the least persuasive at the bottom.: To reduce the damage that the UK does to the environment, and help us meet our Net Zero goals	75
26	Looking at the following, which do you think are the most persuasive reasons to be building more renewable energy sources?Please rank the following, with the most persuasive at the top, and the least persuasive at the bottom.: To reduce the cost of heating and powering homes in the UK by reducing how much gas we need	78
27	Looking at the following, which do you think are the most persuasive reasons to be building more renewable energy sources?Please rank the following, with the most persuasive at the top, and the least persuasive at the bottom.: To bring new green jobs and investment to areas of the UK, and help these places economically grow	81
28	Which of the following comes closest to your view?	84

29 Which of the following comes closest to your view? 87

30 Thinking of wind farms, which of the following comes closest to your view? 90

31 Thinking of solar farms, which of the following comes closest to your view? 93

32 Thinking of overhead powerlines for renewable energy, which of the following comes closest to your view? 96

33 You said that you would oppose wind farms being built in your local area. What are the reasons for this?Please select all that apply. 99

34 You said that you would oppose solar farms being built in your local area. What are the reasons for this?Please select all that apply. 102

35 You said that you would oppose overhead powerlines for renewable energy being built in your local area. What are the reasons for this?Please select all that apply. 105

36 Imagine a developer was proposing to build a new medium-sized wind farm (approximately 12 turbines) a few miles from your home in unused green space. Would you support or oppose this proposal? 108

37 Imagine a developer was proposing to build a new medium-sized wind farm (approximately 12 turbines) a few miles from your home in unused green space. In return, every household within a few miles of the development will receive reductions on their energy bills of £75 a year. Would you support or oppose this proposal? 111

38 You said you did not support a proposal to build a new wind farm within a few miles of your home. If every household within a few miles of the development would receive £75 off their energy bills each year, would you support or oppose the development? 114

39 You said you did not support a proposal to build a new wind farm even if you received £75 off your energy bills each year. If you were offered £150 off your energy bills a year, would you support or oppose the proposal? 117

40 Some people have suggested that new renewable energy projects, like new wind and solar farms, should financially contribute in some way to the communities near where they are built. Which of the following comes closest to your view? 120

41 And which of the following best describes your personal view? 123

42 If a developer was going to provide financial benefits to encourage people to support renewable energy projects, who do you think should receive these benefits? 126

43 Imagine a developer was proposing to build a new medium-sized wind farm (approximately 12 turbines) a few miles from your home in unused green space. In return, the energy company would provide a community development fund of £250,000 a year to be spent on local projects. Would you support or oppose this proposal? 129

44 Imagine a developer was proposing to build a new medium-sized wind farm (approximately 12 turbines) a few miles from your home in unused green space. In return, the energy company would provide a community development fund of £1.25 million every five years to be spent on local projects. Would you support or oppose this proposal? 132

45 Rank Summary: Imagine the construction of a new wind farm in your area resulted in the creation of a community development fund worth £1.25 million every 5 years, the equivalent of £250,000 a year. Which of the following options would you prefer the money from such a fund to be spent on?Please select the three options you would like to be prioritized, and rank them, with your first choice at the top, and third choice at the bottom. (Ordered Left to Right by Rank) 135

46 Imagine the construction of a new wind farm in your area resulted in the creation of a community development fund worth £1.25 million every 5 years, the equivalent of £250,000 a year. Which of the following options would you prefer the money from such a fund to be spent on?Please select the three options you would like to be prioritized, and rank them, with your first choice at the top, and third choice at the bottom.: Investment into local health services like GPs 136

47 Imagine the construction of a new wind farm in your area resulted in the creation of a community development fund worth £1.25 million every 5 years, the equivalent of £250,000 a year. Which of the following options would you prefer the money from such a fund to be spent on?Please select the three options you would like to be prioritized, and rank them, with your first choice at the top, and third choice at the bottom.: Investment into building and maintaining local public spaces like playgrounds and parks 139

48 Imagine the construction of a new wind farm in your area resulted in the creation of a community development fund worth £1.25 million every 5 years, the equivalent of £250,000 a year. Which of the following options would you prefer the money from such a fund to be spent on? Please select the three options you would like to be prioritized, and rank them, with your first choice at the top, and third choice at the bottom.: Investment into local social care services 142

49 Imagine the construction of a new wind farm in your area resulted in the creation of a community development fund worth £1.25 million every 5 years, the equivalent of £250,000 a year. Which of the following options would you prefer the money from such a fund to be spent on? Please select the three options you would like to be prioritized, and rank them, with your first choice at the top, and third choice at the bottom.: Creating a fund which local groups can apply to receive funding from for projects 145

50 Imagine the construction of a new wind farm in your area resulted in the creation of a community development fund worth £1.25 million every 5 years, the equivalent of £250,000 a year. Which of the following options would you prefer the money from such a fund to be spent on? Please select the three options you would like to be prioritized, and rank them, with your first choice at the top, and third choice at the bottom.: Investment into local education services, to offer apprenticeships and training for local people 148

51 Imagine the construction of a new wind farm in your area resulted in the creation of a community development fund worth £1.25 million every 5 years, the equivalent of £250,000 a year. Which of the following options would you prefer the money from such a fund to be spent on? Please select the three options you would like to be prioritized, and rank them, with your first choice at the top, and third choice at the bottom.: Creating a fund to pay for renewable and energy-efficiency upgrades for local houses including insulation, rooftop solar panels and boiler upgrades 151

52 Imagine the construction of a new wind farm in your area resulted in the creation of a community development fund worth £1.25 million every 5 years, the equivalent of £250,000 a year. Which of the following options would you prefer the money from such a fund to be spent on? Please select the three options you would like to be prioritized, and rank them, with your first choice at the top, and third choice at the bottom.: Investment into local infrastructure like public transport 154

53 Imagine the construction of a new wind farm in your area resulted in the creation of a community development fund worth £1.25 million every 5 years, the equivalent of £250,000 a year. Which of the following options would you prefer the money from such a fund to be spent on? Please select the three options you would like to be prioritized, and rank them, with your first choice at the top, and third choice at the bottom.: Investment into building more affordable housing in the local area 157

54 Imagine the construction of a new wind farm in your area resulted in the creation of a community development fund. This fund would pay for energy-efficiency upgrades for 800 homes in the local area over a 25 year period (32 homes a year), which would save each retrofitted house around £300 a year on their energy bills. To what extent would you support or oppose the construction of a wind farm which provided this community development fund? . . 160

55 We will now ask about some of these community benefit proposals in more detail. If a developer was looking to build a wind farm in your local area offered to provide direct payments to each household in the local area of a renewable development, would you support or oppose the building of a wind farm in your local area? 163

56 We will now ask about some of these community benefit proposals in more detail. If a developer was looking to build a wind farm in your local area offered to provide money into a “community benefit fund” which local groups can apply to receive funding from for projects, would you support or oppose the building of a wind farm in your local area? 166

57 If the developer was to offer direct payments to each household in the local area, which of the following would you prefer as the way for this payment to be made assuming it came to the same amount of money in each instance? 169

58 If the developer was to offer money going into a “community benefit fund” which local groups can apply to receive funding from for projects, which of the following would you prefer to decide how the money is spent? 172

59 If renewable developers were required to provide a “community benefit fund”, which of the following would you prefer as ways to decide how much money each developer should put into this fund? 175

60 Which of the following would be your preference for the benefits which a developer building in your local area offered? 178

61 And if a developer proposed to build a wind farm in your local area and offered the option you previously selected which best describes how you would respond to this proposal? 181

62 We have discussed a number of ways that developers could encourage local people to support renewable developments near their home. In general, do you think the following would make you more supportive of a local wind farm being built?: Investment into local health services like GPs 184

63 We have discussed a number of ways that developers could encourage local people to support renewable developments near their home. In general, do you think the following would make you more supportive of a local wind farm being built?: Investment into building and maintaining local public spaces like playgrounds and parks 187

64 We have discussed a number of ways that developers could encourage local people to support renewable developments near their home. In general, do you think the following would make you more supportive of a local wind farm being built?: Investment into local social care services 190

65 We have discussed a number of ways that developers could encourage local people to support renewable developments near their home. In general, do you think the following would make you more supportive of a local wind farm being built?: Creating a fund which local groups can apply to receive funding from for projects 193

66 We have discussed a number of ways that developers could encourage local people to support renewable developments near their home. In general, do you think the following would make you more supportive of a local wind farm being built?: Investment into local education services, to offer apprenticeships and training for local people 196

67 We have discussed a number of ways that developers could encourage local people to support renewable developments near their home. In general, do you think the following would make you more supportive of a local wind farm being built?: Creating a fund to pay for renewable and energy-efficiency upgrades for local houses including insulation, rooftop solar panels and boiler upgrades 199

68 We have discussed a number of ways that developers could encourage local people to support renewable developments near their home. In general, do you think the following would make you more supportive of a local wind farm being built?: Investment into local infrastructure like public transport . . . 202

69 We have discussed a number of ways that developers could encourage local people to support renewable developments near their home. In general, do you think the following would make you more supportive of a local wind farm being built?: Investment into building more affordable housing in the local area 205

70 And in general, do you think you would support or oppose developers using these community benefits to encourage local people to support building renewable energy near them? 208

71 Are you aware of any renewable energy developments already existing in your local area? 211

72 How far from your home is this renewable energy development?If you are aware of more than one, please think of the one closest to your home 213

73 In general, would you say this local renewable energy development has a positive or negative impact on your life? 216

74 Do you remember there being any resistance to the development when it was proposed or built? 219

75 Did you personally oppose the development at the time? 222

(1.A) Which do you think are the most important issues facing the country at this time? Please tick up to three

Data weighted by age and gender to be representative of rural areas

Public First Poll for Onward Wind

Rank Summary: Looking at the following, which do you think are the most persuasive reasons to be building more renewable energy sources? Please rank the following, with the most persuasive at the top, and the least persuasive at the bottom. (Ordered Left to Right by Rank)

	1. To make sure the UK's energy supply is secure, and we are not reliant on countries like Russia for our energy	2. To reduce the cost of heating and powering homes in the UK by reducing how much gas we need	3. To reduce the damage that the UK does to the environment, and help us meet our Net Zero goals	4. To bring new green jobs and investment to areas of the UK, and help these places economically grow

Data weighted by age and gender to be representative of rural areas

Rank Summary: Imagine the construction of a new wind farm in your area resulted in the creation of a community development fund worth £1.25 million every 5 years, the equivalent of £250,000 a year. Which of the following options would you prefer the money from such a fund to be spent on? Please select the three options you would like to be prioritized, and rank them, with your first choice at the top, and third choice at the bottom. (Ordered Left to Right by Rank)

	1. Creating a fund to pay for renewable and energy-efficiency upgrades for local houses including insulation, rooftop solar panels and boiler upgrades	2. Invest- ment into local health services like GPs	3. Invest- ment into local infrastructure like public transport	4. Invest- ment into building and main- taining local public spaces like play- grounds and parks	5. Invest- ment into local social care services	6. Creating a fund which local groups can apply to receive funding from for projects	7. Invest- ment into local education services, to offer appren- ticeships and training for local people	8. Invest- ment into building more affordable housing in the local area
1-Highest Rank	29%	21%	9%	8%	8%	8%	7%	10%

Data weighted by age and gender to be representative of rural areas

(46.B) Imagine the construction of a new wind farm in your area resulted in the creation of a community development fund worth £1.25 million every 5 years, the equivalent of £250,000 a year. Which of the following options would you prefer the money from such a fund to be spent on? Please select the three options you would like to be prioritized, and rank them, with your first choice at the top, and third choice at the bottom.: Investment into local health services like GPs

Data weighted by age and gender to be representative of rural areas

(49.B) Imagine the construction of a new wind farm in your area resulted in the creation of a community development fund worth £1.25 million every 5 years, the equivalent of £250,000 a year. Which of the following options would you prefer the money from such a fund to be spent on? Please select the three options you would like to be prioritized, and rank them, with your first choice at the top, and third choice at the bottom.: Creating a fund which local groups can apply to receive funding from for projects

Data weighted by age and gender to be representative of rural areas

(55.B) We will now ask about some of these community benefit proposals in more detail. If a developer was looking to build a wind farm in your local area offered to provide direct payments to each household in the local area of a renewable development, would you support or oppose the building of a wind farm in your local area?
