

Public First Poll for Onward 1

Fieldwork: 15th Feb - 23rd Feb 2022
Interview method: Online Survey
Population represented: UK Adults
Sample size: 4021

Methodology:

All results are weighted using Iterative Proportional Fitting, or 'Raking'. The results are weighted by interlocking age & gender, region and social grade to Nationally Representative Proportions

Public First is a member of the BPC and abides by its rules. For more information please contact the Public First Polling Team (polling@publicfirst.co.uk)

List of Tables

1	If a general election was called tomorrow, how likely would you be to vote? Please rate from 0 to 10, where 0 means certain not to vote, and 10 means certain to vote.	7
2	And, if a general election was called tomorrow, which party would you vote for?	10
3	You said you would vote for the Conservative if there was a general election. If this option was unavailable, which party would you vote for instead, if any?	13
4	You said you would vote for the Labour party if there was a general election. If this option was unavailable, which party would you vote for instead, if any?	16
5	You said you would vote for the Liberal Democrats if there was a general election. If this option was unavailable, which party would you vote for instead, if any?	19
6	For each of the following political parties, please indicate if you would consider voting for them:: Conservative Party	22
7	For each of the following political parties, please indicate if you would consider voting for them:: Labour Party	25
8	For each of the following political parties, please indicate if you would consider voting for them:: Liberal Democrats	28
9	For each of the following political parties, please indicate if you would consider voting for them:: Green Party	31
10	For each of the following political parties, please indicate if you would consider voting for them:: Reform UK / The Brexit Party	34
11	Which do you think are the most important issues facing the country at this time?Please tick up to three	37
12	Which do you think are the most important issues facing you and your family?Please tick up to three	40
13	Which, if any, of the following issues have you begun to take more seriously in the last few years?Please select all that apply	43
14	Which, if any, of the following issues do you wish politicians would take more seriously than they currently do?Please select all that apply	46
15	Thinking further ahead, to the future lives of your children and grandchildren, which issues do you think are most important facing the country?Please tick up to three	49
16	Which of the following challenges facing the world do you think are the most serious?Please select up to three	52
17	If you had to choose, who do you think would make the better Prime Minister: current Prime MInister Boris Johnson, or Labour Leader Keir Starmer?	55
18	Do you think Boris Johnson should resign as Prime Minister or carry on?	57
19	Let us assume that Boris Johnson resigned as Prime Minister and was replaced by another leading member of the Conservative Government. Would you be more or less likely to vote Conservative at the next election, or would it make no difference?	60
20	Let us assume that Boris Johnson resigned as Prime Minister and was replaced by another leading member of the Conservative Government.Who would you expect to vote for at the next election?	63
21	Thinking about the next General Election, which of the following would be most important for a political party to focus on in order to get your vote?Please select up to three	66
22	Do you think Labour or the Conservative Party has the best policies on the following issues?: Welfare	69
23	Do you think Labour or the Conservative Party has the best policies on the following issues?: Climate change / the environment	72
24	Do you think Labour or the Conservative Party has the best policies on the following issues?: Healthcare / the NHS	75
25	Do you think Labour or the Conservative Party has the best policies on the following issues?: Immigration	78
26	Do you think Labour or the Conservative Party has the best policies on the following issues?: Crime	81
27	Do you think Labour or the Conservative Party has the best policies on the following issues?: Defence	84
28	Thinking about what you know of the Conservative Party’s current policies on the following issues, do you think they have the right policies or the wrong policies?: Welfare	87
29	Thinking about what you know of the Conservative Party’s current policies on the following issues, do you think they have the right policies or the wrong policies?: Climate change / the environment	89

30 Thinking about what you know of the Conservative Party’s current policies on the following issues, do you think they have the right policies or the wrong policies?: Healthcare / the NHS 92

31 Thinking about what you know of the Conservative Party’s current policies on the following issues, do you think they have the right policies or the wrong policies?: Immigration 95

32 Thinking about what you know of the Conservative Party’s current policies on the following issues, do you think they have the right policies or the wrong policies?: Crime 97

33 Thinking about what you know of the Conservative Party’s current policies on the following issues, do you think they have the right policies or the wrong policies?: Defence 99

34 The Government is being encouraged to find ways to cut the cost of living. Which of the following policies or measures would you most support the Government introducing to help with the cost of living?Please select up to three 101

35 Which of the following comes closest to your view? 104

36 Which of the following characteristics would you most like to see in a new Prime Minister?Please select up to five of the following 107

37 The Government has announced plans to achieve Net Zero in the UK by 2050. Prior to taking this poll, had you heard of this plan? 110

38 The Net Zero target is a target to reach zero greenhouse gas emissions in the UK, balancing any carbon emissions that are produced with carbon reducing measures, in order to reduce the risks from climate change.Do you support or oppose the UK plan to reach Net Zero by 2050? 113

39 If a political party said they were going to get rid of the target to reach Net Zero greenhouse gas emissions, how would this impact your likelihood to vote for this party if at all? 116

40 If a political party said they were going to bring forward the target to reach Net Zero greenhouse gas emissions to 2035, instead of the current target of 2050, how would this impact your likelihood to vote for this party if at all? 119

41 If a political party said they were going to bring forward the target to reach Net Zero greenhouse gas emissions to 2045, instead of the current target of 2050, how would this impact your likelihood to vote for this party if at all? 122

42 If a political party said they were going to delay the target to reach Net Zero greenhouse gas emissions to 2055, instead of the current target of 2050, how would this impact your likelihood to vote for this party if at all? 125

43 If a political party said they were going to delay the target to reach Net Zero greenhouse gas emissions to 2065, instead of the current target of 2050, how would this impact your likelihood to vote for this party if at all? 128

44 Which of the following comes closest to your view: 131

45 Some politicians have said they are in favour of getting rid of the Net Zero target in the UK. What do you think are the reasons they feel this way?Select as many as apply 134

46 Do you agree or disagree with the following: There is no good reason to get rid of the UK’s Net Zero target 137

47 Do you agree or disagree with the following: Politicians who oppose Net Zero have been bought out by fossil fuel companies 140

48 Do you agree or disagree with the following: Ordinary people in the UK tend to care more about the environment than politicians do 143

49 Do you agree or disagree with the following: A political party that got rid of the UK plans to reach Net Zero would not win an election 146

50 How seriously do you take the issue of climate change? 149

51 Do you agree or disagree with the following: I have noticed changes in weather patterns in the UK in my lifetime 152

52 Do you agree or disagree with the following: The weather now is the same as it was when I was a child 155

53 Do you agree or disagree with the following: I have seen more stories about extreme weather events (such as flooding, forest fires) in the last few years than ever before 158

54 You said that you had noticed changes in weather patterns in the UK. Which of the following have you noticed?Please select any which apply 161

55 In your view, should the UK be taking more or less action on climate change? 164

56 You said the UK should be taking less action on climate change. What are the reasons for this?Please select any which apply 167

57 You said the UK should be taking more action on climate change. What are the reasons for this?Please select any which apply 170

58 Do you think taking action to address climate change in the UK will have a positive or negative effect on the following?: The quality of the air in the UK 173

59 Do you think taking action to address climate change in the UK will have a positive or negative effect on the following?: The availability of well-paid jobs in the UK 176

60 Do you think taking action to address climate change in the UK will have a positive or negative effect on the following?: The security of energy supplies in the UK 179

61 Do you think taking action to address climate change in the UK will have a positive or negative effect on the following?: Children in the UK’s future . . 182

62 Do you think taking action to address climate change in the UK will have a positive or negative effect on the following?: The world in general 185

63 Do you think taking action to address climate change in the UK will have a positive or negative effect on the following?: The UK economy 188

64 What are the biggest advantages of the UK moving to Net Zero carbon emissions, if any?Select up to three of the following 191

65 In your view, would moving to Net Zero emissions in the UK create jobs or lose jobs? 194

66 In your view, which regions of the UK would benefit the most from any jobs created by the UK’s transition to Net Zero, if any?Please select up to three . 197

67 Which of the following arguments on the topic of Net Zero do you find more convincing?Please indicate on the scale from 1-4 200

68 Which of the following arguments on the topic of Net Zero do you find more convincing?Please indicate on the scale from 1-4 203

69 Which of the following arguments on the topic of Net Zero do you find more convincing?Please indicate on the scale from 1-4 206

70 Which of the following arguments on the topic of Net Zero do you find more convincing?Please indicate on the scale from 1-4 209

71 Do you tend to agree or disagree with the following: The quality of air in my area improved during lockdown 212

72 Do you tend to agree or disagree with the following: Since we have come out of lockdown, I have noticed the air is dirtier 215

73 Do you tend to agree or disagree with the following: I have never noticed any change in air quality in my area 218

74 Do you tend to agree or disagree with the following: We have a duty to care for our planet and the environment to ensure our grandchildren can live comfortably 221

75 Do you tend to agree or disagree with the following: Politicians should tax the massive profits of energy companies to fund a tax cut for working class families to meet rising costs 224

76 Do you tend to agree or disagree with the following: “Going green” is too expensive 227

77 Do you tend to agree or disagree with the following: Politicians who want to stop Net Zero are only interested in helping big fossil fuel companies make money 230

78 Which of the following comes closest to your view 233

79 You said that you would vote Conservative if there was a general election. If the Conservatives stated before the next election that they wanted to get rid of the UK’s Net Zero target of 2050 as it was too expensive, how would this impact your likelihood to vote for them? 236

80 You said that you would vote Labour if there was a general election. If the Labour party stated before the next election that they wanted to get rid of the UK’s Net Zero target of 2050 as it was too expensive, how would this impact your likelihood to vote for them? 239

81 And if there was a general election in which the Conservative party ran with a promise to remove the UK’s target to reach Net Zero by 2050, how do you think you would vote? 242

82 You said you did not know how you would vote if there was a general election in which the Conservative party ran with a promise to remove the UK’s target to reach Net Zero by 2050. If you had to vote, which way would you vote? 245

83 If the UK was to get rid of the national target of reaching Net Zero by 2050, which of the following, if any, do you think would happen as a result?: The UK would have more money to spend on other areas 248

84 If the UK was to get rid of the national target of reaching Net Zero by 2050, which of the following, if any, do you think would happen as a result?: There would be more incidences of flooding in the UK 251

85 If the UK was to get rid of the national target of reaching Net Zero by 2050, which of the following, if any, do you think would happen as a result?: The world would be less safe 254

86 If the UK was to get rid of the national target of reaching Net Zero by 2050, which of the following, if any, do you think would happen as a result?: It would damage the UK’s reputation on the world stage 257

87 If the UK was to get rid of the national target of reaching Net Zero by 2050, which of the following, if any, do you think would happen as a result?: Other countries around the world would follow suit and get rid of their own targets 260

88 If the UK was to get rid of the national target of reaching Net Zero by 2050, which of the following, if any, do you think would happen as a result?: More animal and plant species would go extinct 263

89 If the UK was to get rid of the national target of reaching Net Zero by 2050, which of the following, if any, do you think would happen as a result?: Parts of the world will become unbearably hot 266

90 Imagine a politician gave a speech on their views on climate change. Below is an excerpt from that speech. Please read it carefully: “We have no idea if the climate is changing - we can’t even predict the weather accurately tomorrow. So-called scientific models kept getting Covid wrong. They told us we’d be destroyed by the Millenium bug, when nothing happened. Climate change is just another excuse for rich elites to lecture the rest of us on how to live our lives. They can afford to make the changes to their lives which they recommend, while the rest of us cannot. Trying to reach Net Zero will just leave us all worse-off, and we’ll get nothing for our efforts. We need to stop this madness now before it runs our economy into the ground.” In general, would you say that you agree or disagree with what the politician said in this speech? 269

91 Imagine a politician gave a speech on their views on climate change. Below is an excerpt from that speech. Please read it carefully: “There is no doubt that climate change is real and happening, but we need to have a serious debate about what we can do about it. The UK only contributes 1% of global emissions. Our actions as a country will have no effect on whether climate change occurs or not. All it will do is change how much money people in the UK have to spend. We have now seen the reality of this with our energy bills increasing in cost by 50% since last year. We need to change our focus to avoid damaging our economy, and put the concerns about the climate to one side for the time being.” In general, would you say that you agree or disagree with what the politician said in this speech? 272

92 Imagine a politician gave a speech on their views on climate change. Below is an excerpt from that speech. Please read it carefully: “No serious scientist now doubts the reality of climate change. David Attenborough has said that “if we don’t act now, it will be too late”. Fortunately, taking action on the climate would actually really benefit the UK. It will create thousands of new skilled jobs in manufacturing as we move to renewable energy like offshore wind. It will reduce our dependence on countries like Russia to heat our homes. It will establish the UK globally as a leader in science and innovation. It will make our air cleaner, improving everyone in the country’s health and making it more pleasant to go outside. We need to stop kicking the can down the round, and get on with saving the planet.” In general, would you say that you agree or disagree with what the politician said in this speech? 275

93 Imagine a politician gave a speech on their views on climate change. Below is an excerpt from that speech. Please read it carefully: “For years, politicians have promised us they’d take action on the environment so our grandchildren could live happily and comfortably. Instead, they’ve squabbled amongst themselves, and put their own self-interest ahead of that of the country. International treaties that would have reduced emissions from countries like India and China have been watered down. Rather than tax the polluting industries in the UK, politicians would prefer to pander to them to secure themselves a big pay-out whilst working people pick up the costs in their energy bills. They’ve done nothing to create jobs in the cleaner, greener industries of the future which would create long-term jobs for those that need them. We’re living in a society which is expensive, unfair and now getting hotter and less pleasant to live in. We need an economic policy which helps the environment and ordinary British families and which ensures that our grandchildren live the sorts of lives they deserve.” In general, would you say that you agree or disagree with what the politician said in this speech? 278

94 Below are some key lines from the speech. Do you agree or disagree with the following parts of the speech?: We have no idea if the climate is changing - we can’t even predict the weather accurately tomorrow 281

95 Below are some key lines from the speech. Do you agree or disagree with the following parts of the speech?: Climate change is just another excuse for rich elites to lecture the rest of us on how to live our lives 284

96 Below are some key lines from the speech. Do you agree or disagree with the following parts of the speech?: Rich elites can afford to make the changes to their lives which they recommend, while the rest of us cannot 287

97 Below are some key lines from the speech. Do you agree or disagree with the following parts of the speech?: Trying to reach Net Zero will just leave us all worse-off, and we'll get nothing for our efforts 290

98 Below are some key lines from the speech. Do you agree or disagree with the following parts of the speech?: We need to stop this madness now before it runs our economy into the ground 293

99 Would it improve or worsen your view of a politician if they said this? 296

100 Which of the following words would you use to describe the speech you just saw?Please select any which apply 299

101 Below are some key lines from the speech. Do you agree or disagree with the following parts of the speech?: There is no doubt that climate change is real and happening, but we need to have a serious debate about what we can do about it 302

102 Below are some key lines from the speech. Do you agree or disagree with the following parts of the speech?: Our actions as a country will have no effect on whether climate change occurs or not 305

103 Below are some key lines from the speech. Do you agree or disagree with the following parts of the speech?: All our actions on climate change will do is change how much money people in the UK have to spend 308

104 Below are some key lines from the speech. Do you agree or disagree with the following parts of the speech?: We have now seen the reality of climate action with our energy bills increasing in cost by 50% since last year 311

105 Below are some key lines from the speech. Do you agree or disagree with the following parts of the speech?: We need to change our focus to avoid damaging our economy, and put the concerns about the climate to one side for the time being 314

106 Would it improve or worsen your view of a politician if they said this? 317

107 Which of the following words would you use to describe the speech you just saw?Please select any which apply 320

108 Below are some key lines from the speech. Do you agree or disagree with the following parts of the speech?: If we don't act now on climate change, it will be too late 323

109 Below are some key lines from the speech. Do you agree or disagree with the following parts of the speech?: Taking action on the climate will create thousands of new skilled jobs in manufacturing as we move to renewable energy like offshore wind 326

110 Below are some key lines from the speech. Do you agree or disagree with the following parts of the speech?: Taking action on the climate will reduce our dependence on countries like Russia to heat our homes 329

111 Below are some key lines from the speech. Do you agree or disagree with the following parts of the speech?: Taking action on the climate will make our air cleaner, improving everyone in the country's health and making it more pleasant to go outside 332

112 Below are some key lines from the speech. Do you agree or disagree with the following parts of the speech?: We need to stop kicking the can down the round, and get on with saving the planet 335

113 Would it improve or worsen your view of a politician if they said this? 338

114 Which of the following words would you use to describe the speech you just saw?Please select any which apply 341

115 Below are some key lines from the speech. Do you agree or disagree with the following parts of the speech?: Politicians have squabbled amongst themselves, and put their own self-interest ahead of that of the country on climate change 344

116 Below are some key lines from the speech. Do you agree or disagree with the following parts of the speech?: Politicians have done nothing to create jobs in the cleaner, greener industries of the future which would create long-term jobs for those that need them 347

117 Below are some key lines from the speech. Do you agree or disagree with the following parts of the speech?: Rather than tax the polluting industries in the UK, politicians would prefer to pander to them to secure themselves a big pay-out whilst working people pick up the costs in their energy bills 350

118 Below are some key lines from the speech. Do you agree or disagree with the following parts of the speech?: We're living in a society which is expensive, unfair and now getting hotter and less pleasant to live in 353

119	Below are some key lines from the speech. Do you agree or disagree with the following parts of the speech?: We need an economic policy which helps the environment and ordinary British families and which ensures that our grandchildren live the sorts of lives they deserve	356
120	Would it improve or worsen your view of a politician if they said this?	359
121	Which of the following words would you use to describe the speech you just saw?Please select any which apply	362

(1.A) If a general election was called tomorrow, how likely would you be to vote? Please rate from 0 to 10, where 0 means certain not to vote, and 10 means certain to vote.

(90.A) Imagine a politician gave a speech on their views on climate change. Below is an excerpt from that speech. Please read it carefully: "We have no idea if the climate is changing - we can't even predict the weather accurately tomorrow. So-called scientific models kept getting Covid wrong. They told us we'd be destroyed by the Millennium bug, when nothing happened. Climate change is just another excuse for rich elites to lecture the rest of us on how to live our lives. They can afford to make the changes to their lives which they recommend, while the rest of us cannot. Trying to reach Net Zero will just leave us all worse-off, and we'll get nothing for our efforts. We need to stop this madness now before it runs our economy into the ground." In general, would you say that you agree or disagree with what the politician said in this speech?

(91.A) Imagine a politician gave a speech on their views on climate change. Below is an excerpt from that speech. Please read it carefully: "There is no doubt that climate change is real and happening, but we need to have a serious debate about what we can do about it. The UK only contributes 1% of global emissions. Our actions as a country will have no effect on whether climate change occurs or not. All it will do is change how much money people in the UK have to spend. We have now seen the reality of this with our energy bills increasing in cost by 50% since last year. We need to change our focus to avoid damaging our economy, and put the concerns about the climate to one side for the time being." In general, would you say that you agree or disagree with what the politician said in this speech?

(92.A) Imagine a politician gave a speech on their views on climate change. Below is an excerpt from that speech. Please read it carefully: "No serious scientist now doubts the reality of climate change. David Attenborough has said that "if we don't act now, it will be too late". Fortunately, taking action on the climate would actually really benefit the UK. It will create thousands of new skilled jobs in manufacturing as we move to renewable energy like offshore wind. It will reduce our dependence on countries like Russia to heat our homes. It will establish the UK globally as a leader in science and innovation. It will make our air cleaner, improving everyone in the country's health and making it more pleasant to go outside. We need to stop kicking the can down the road, and get on with saving the planet." In general, would you say that you agree or disagree with what the politician said in this speech?

(93.A) Imagine a politician gave a speech on their views on climate change. Below is an excerpt from that speech. Please read it carefully: "For years, politicians have promised us they'd take action on the environment so our grandchildren could live happily and comfortably. Instead, they've squabbled amongst themselves, and put their own self-interest ahead of that of the country. International treaties that would have reduced emissions from countries like India and China have been watered down. Rather than tax the polluting industries in the UK, politicians would prefer to pander to them to secure themselves a big pay-out whilst working people pick up the costs in their energy bills. They've done nothing to create jobs in the cleaner, greener industries of the future which would create long-term jobs for those that need them. We're living in a society which is expensive, unfair and now getting hotter and less pleasant to live in. We need an economic policy which helps the environment and ordinary British families and which ensures that our grandchildren live the sorts of lives they deserve." In general, would you say that you agree or disagree with what the politician said in this speech?

(93.B) Imagine a politician gave a speech on their views on climate change. Below is an excerpt from that speech. Please read it carefully: "For years, politicians have promised us they'd take action on the environment so our grandchildren could live happily and comfortably. Instead, they've squabbled amongst themselves, and put their own self-interest ahead of that of the country. International treaties that would have reduced emissions from countries like India and China have been watered down. Rather than tax the polluting industries in the UK, politicians would prefer to pander to them to secure themselves a big pay-out whilst working people pick up the costs in their energy bills. They've done nothing to create jobs in the cleaner, greener industries of the future which would create long-term jobs for those that need them. We're living in a society which is expensive, unfair and now getting hotter and less pleasant to live in. We need an economic policy which helps the environment and ordinary British families and which ensures that our grandchildren live the sorts of lives they deserve." In general, would you say that you agree or disagree with what the politician said in this speech?
