Our 35-at-55 pension will be $5,300 a month.

Our 30-at-55 pension will be $4,800 month plus $100 for each additional year of service up to $5,300.

Our 35-&-out, 30-&-out, 25-at-57, and 25-&-out benefits are all increased.

More than 60,000 full-time UPS Teamsters in the Central Region, South and the Carolinas have won record pension increases of up to $1,000/month.

The IBT-UPS Pension Plan covers Teamsters in 22 states. We are in the biggest pension plan covering full-time UPS Teamsters, but for years our pensions have lagged behind.

By sticking together and standing up to UPS, we have won massive pension increases. Under the new contract:

- Our 35-at-55 pension will be $5,300 a month.
- Our 30-at-55 pension will be $4,800 month plus $100 for each additional year of service up to $5,300.
- Our 35-&-out, 30-&-out, 25-at-57, and 25-&-out benefits are all increased.

Anyone who reaches these benchmarks during the contract can retire with these benefits any time on or after January 1 2024—as long as the contract is approved.

Members passed out UPS Teamsters United leaflets and petitions to demand these improvements. Sean O’Brien and our National Negotiating Committee fought for us at the bargaining table—and together we won.

The new contract also includes $7.50 raises for every Teamster, eliminates two-tier 22.4, ends forced 6th punch, bans driver-facing surveillance cameras, establishes MLK Day as a paid holiday, forces UPS to install AC in one-third of its fleet, and more.
