

Conservation Management help government agencies navigate long-term and large-scale environmental projects through the changing nature of political dynamics.

We link government with the right people:

- To get and share information, and
- See what is working on the ground.

Our expertise in planning, operations, monitoring and communications, assists government at many levels.

Federal and State Governments can benefit from:

- **Capacity Building**
 - Training and Mentoring
- **Strategic Planning and facilitation**
 - Indigenous Land Use Agreements (ILUA)
 - Joint and Co-management
- **MERI** – Monitor, Evaluation, Reporting and Improvement
- **Indigenous and Community** engagement
 - we have many **established relationships** nationally
- **Project implementation**
 - expertise and tools

Adaptive land + sea management with those who care about the future.

Conservation Managements business growth comes from working with people and delivering positive outcomes.

Our company is a registered Social Enterprise – we are committed to working in a way that feels right. Our Social + Environmental Enterprise Purpose ensures we reinvest 70% of company profits into achieving our mission:

"We help people to manage landscapes to be healthier by connecting, people, projects and places, using practical adaptive management and collaboration tools"

The right people working together in the right way:

We find solutions, establish pathways and implement actions that achieve meaningful outcomes for people and environments; locally and internationally. We use the Open Standards for the Practice of Conservation process which is applied successfully internationally. As adaptive project managers with extensive networks, we are aware of innovations and global trends. We apply these locally.

We work with:

We support you with:

Conservation Management is proud to use Healthy Country Planning and the Open Standards. HCP was developed by many communities and people and we acknowledge all contributors past and present.
