

Ade Olumide Letter To Voters Re Competence and Ethics

Dear Voters,

It is almost impossible for any other mayoral candidate to present a more competent and or more ethical platform Please don't let the **mainstream censorship media and city sunshine list ruling class** hypocrites saddle you with an incompetent and ethically bankrupt status quo mayor, an Ottawa correct interpretation of the Criminal Code and Charter affects all cities in Ontario and Canada. They can defraud rebuttal rights, but, their inability to refute this Competence and Ethics Platform, is in and of itself, a reason to vote for Ade.

Please share this **6-pillar platform** to your social media network:

Platform 1- End Ottawa Elections Gambling

Platform 2- Zero Waste Recycling Centre For Weekly Garbage, Windmills Bylaw, Hydro Free Trade.

Platform 3- No New Money, Income Equity Lens, 1% Cap On Taxes & Fees, Reduce The Impact Of 121K Per Person Through A 4-Year Hiring Freeze & Ottawa Contractors, End The Rural Storm Water Heist.

Platform 4- Rural Home To LRT Shuttle, Fund Middle Class Eligibility For Free Transit Through Attrition, Increase Frequency, Increase Road Maintenance, Transit Bill of Rights.

Platform 5- Police Complaints Bill Of Rights For The Public & Other Police Officers, Ameliorate The Impact Of 151K Per Person By Maximising The Ratio Of Sworn Vs Unsworn Police Personnel.

Platform 6- Ottawa Ombudsman Defacto Judicial Review Of Any Integrity Commissioner Or Auditor General Or Board Alleged Violation Of The Charter Or Criminal Or Other Codes Re Civil & Property Bill of Rights, End Reverse Robinhood Home Construction Policies.

Let's change the way we evaluate political leaders; my competitors can play the role of **political Santa Clause** that raise taxes or user fees or invent rural storm water fees, but competent leadership requires prioritization of

services and reducing the cost of delivering services. For example, just as the unions consented to LRT private operation, they will likely not oppose a private or 3P operation of a Rural LRT shuttle.

It takes competent and common-sense leadership to convince other levels of government that one of the best contributions that municipalities can make to **save the environment without hurting the middle class** through inflation, higher taxes and higher user fees; is funding some free transit so as to increase the low income, health promotion, environmental rate of return on transit capital costs like LRT, subways, rail, electric buses which transfer billions to rich corporations. While the federal government 1.7 billion for electric car rebates is intended to save the environment, it will also enrich billionaires like Elon Musk, while the middle class struggle to pay for transit. A 4-year hiring freeze can maybe raise \$56 million in free transit for low-income residents but this cannot replace about \$166 million OC Transpo fare revenue or fund improvements.

It takes competent and compassionate leadership to implement an income equity lens strategy to end the intergenerational trauma by some sunshine list gatekeepers who may already own homes, and are insensitive to young families, millennials, generation Z and the ability of new Canadians to purchase a house. In the G7, Canada has the lowest average housing supply per capital. The price of the average home in Ottawa more than doubled from about \$350K in 2015 to about \$850K in 2022. Reasons include the lack of inventory to ensure that home construction keeps pace with population growth. The sunshine list ruling class just increased by about 10%, the construction cost for new homes. This Mayor will work to end the **reverse robin hood scarcity of homes**, which is a consequence of sunshine list war on the working class.

It takes competent and bold leadership to convince other levels of government and the Federation of Canadian Municipalities “FCM” that one of the best contributions that municipalities can make to the environment without hurting below average income earners, is increasing hydro generation from water by advocating for a **Canadian hydro free trade** agreement.

It takes competent and innovative leadership to convince Ontario and Council that Ottawa cannot continue **harming the environment through landfill emissions**, Ottawa should immediately learn from Edmonton’s Zero Waste Recycling Centre, which would also facilitate the return of weekly garbage collection.

Any candidate for Mayor can maintain the status quo of city employee crimes against residents and city employees that they are paid to protect, but ethical leadership means that since city employees commit crimes, a candidate that refuses a Police Complaints Bill of Rights without proposing alternative text with similar intent, is violating s21b s22.2 s23 Criminal Code (**ethical bankruptcy**), and therefore unfit to serve in Council.

It takes competent and ethical leadership to convince Ontario, Association of Municipalities Of Ontario “AMO”, Rural Ontario Municipal Association “ROMA”, Office of the Independent Police Review Director, Council and the Ottawa Police Services Board “OPSB”, that s219 Criminal Code, s7 Charter of Rights to life, health, safety, security and property is not discretionary, there is no higher law or policy creation duty for elected officials. Don’t incite police violations of s80,s81 Police Services Act, aspects of the **Police Complaints Bill of Rights** should be enshrined in the Police Services Act and police services board polices across Ontario.

It takes competent and courageous leadership to convince unions that in a hiring freeze, members would have the benefit of **first applicant for vacancies** that may arise through attrition. While they opposed Ontario’s 1% compensation cap, they should not oppose an Ottawa 1% cap on department budgets (excluding transit), they should not oppose a private service that does not exist e.g. a Rural or Urban Home to LRT shuttle.

While other departments were posting COVID surpluses, Ottawa Police posted a 2021 deficit. We need to recover taxpayer funds that were paid for services not rendered by promoting a police officer who has exemplified the ethical compass that is required to implement a Police Complaints Bill of Rights. This

candidate for Mayor hereby publicly informs the OSPB that if elected, he will not seat on the OPSB but would **oppose recruiting a Police Chief or Deputy Chief from outside Ottawa Police**. The exception is if the OIPRD or the OPS professional services investigator or Chief or the Civilian Complaints Police Commission or the Ontario government compensate Ottawa for the cost of their broken complaint process. Settlements with police chiefs raises questions, if Ottawa did not request resignations, why abuse taxpayer funds to settle? It is defamatory to allege that there is no Ottawa Police officer with the ethical compass to continue the progressive policing of the former Chief and implement a Police Complaints Bill of rights for the public and other police officers. We should promote an officer that puts integrity before the blue code of loyalty. We should also expand the search to include existing City staff with or without policing experience.

This Mayor will not pass the buck or blame others for failures in Mayoral leadership. The independence of city boards will be respected, but this Mayor will issue public opinions about significant failures in leadership by a city board. If Council abandons laws which bind Council, this Mayor will not abandon the voters, he will issue a Mayoral *Police, Civil and Property Complaints Bill of Rights* so that city boards, Integrity Commissioner, Auditor General, City Manager, know the type of unlawful conduct that will attract a public rebuke from the Mayor. Silence on “accountability” or “transparency” gaps in OPSB complaint administration policies, could lead to an accusation that a Mayor is s21b s22.2 s23 Criminal Code party to the media report alleging that OPSB is party to OPS rape culture. In light of police misconduct, voting against a Police Complaints Bill of Rights is a crime, **I dare any media or Council or staff or OPSB or Police Chief to refute this statement.**

I appeal to supporters of ALL political parties; includes Liberal, Conservative, NDP, PPC, Green and other political parties. We will not agree on everything, but please evaluate this application to become your public servant based on the platform common ground, rather than the main-stream censorship media and political elite. The Ottawa status quo is a defacto Liberal NDP Green party coalition government, no political party has a monopoly on good ideas, as Mayor, I will lead a Liberal NDP Green Conservative Party coalition government. I say to all councillor candidates, that, they have a **duty to their constituents to publicly agree or disagree** with my detailed platform. If I win, they should respect a city-wide mandate, if they do not, I will try to find common ground, if that fails, I may start a Competence and Ethics Municipal Political Party.

Your Public Servant

Ade Olumide

Candidate for Mayor of Ottawa
