Connect you with Jeannette.

Basically for category 3 if we go to the point of asking people in Hubei to self isolate we have to cheat that science is not robust the transmission during incubation period. However while the science is evolving during period of uncertainty and out if an abundance of caution we are asking those from Hubei to self isolate.....

Operationally very difficult to do

Check number of passengers with HPOC
I think we get approx 60 a day

Schedules are changing I will be at a meeting downtown for 12:30-
