

Invest in Our Future Green Workforce

The LA Regional Cleantech Career Academy is building Los Angeles' future clean energy workforce by connecting talented young adults ages 18 to 24 with paid, career-connected learning, industry mentorship and real-world experience in the rapidly growing cleantech sector. Informed by our employer partners, the Academy develops a diverse pipeline of skilled, motivated talent while creating meaningful pathways to high-growth careers.

From Classroom to Career:

When Emilie Reyes joined the Cleantech Academy in 2023, she was a high school senior looking to explore career possibilities and gain professional experience. Today, Emilie is a senior at CSU Long Beach studying Information Systems and serving as an intern with the Los Angeles Department of Water and Power's Information Technology Services division. Through the Academy, Emilie gained more than industry exposure. One-on-one mentorship, career coaching and direct engagement with cleantech professionals gave her the confidence, connections and support to turn exploration into a clear career pathway in the cleantech industry.

"The Academy helped me build confidence in my communication and presentation skills while giving me exposure to the professional world. The experience continues to support my growth as I pursue a career in information systems."

Emilie Reyes, Cleantech Academy Alumna

The Power of Employer Partnership

Emilie's story reflects the impact of employer partners like LADWP, whose investment in the Cleantech Academy creates direct pathways into students' futures. Since becoming an official partner in 2025, LADWP has provided 20 internships across cleantech departments, giving students hands-on experience in careers that power and sustain Los Angeles.

"We partnered with UNITE-LA to bring civil service careers to life for college students enrolled in the Cleantech Academy. Expanding these partnerships is critical to developing the skilled, diverse workforce LADWP needs to meet current and future workforce demands."

Breonia Lindsey, Assistant General Manager, Customer and Community Equity Strategies

One student's journey. One employer's investment. A workforce future built together.

Education Innovation Through Collaboration

Each year, we celebrate students completing our Academy with a graduation ceremony that marks the beginning of their professional journey. This December, the Cleantech Academy Graduation Ceremony will honor more than 50 young adults as they launch careers in high-demand clean energy and sustainability industries. Sponsorship offers a unique opportunity to invest in the next generation of workforce talent while gaining visibility among employers, civic leaders and community partners.

	Title: \$50K	Premier: \$25K	Industry: \$10K	Supporter: \$5K
	Funds scholarships for each student in the graduating cohort for education or training.	Funds stipends for 10 students to participate through our earn-and-learn model.	Funds advanced training certifications for two cohorts of participants, including OSHA training and Green Jobs.	Funds transportation for all students annually to attend in-person programming including site visits and networking events.
