LETTER FROM THE CHAIR

Peace be upon you, and the mercy of Allah, and His blessings,

Dear UOSSM Family,

It is with immense gratitude that I present to you UOSSM Canada's Annual Report. This past year has been one of significant challenges and remarkable achievements, as we continued our mission to provide life-saving medical care to those in desperate need.

The crisis in Gaza, Syria and other crisis-affected regions has only deepened, but Alhamdulillah, with your unwavering support, we have been able to respond effectively. Our dedicated teams on the ground have worked tirelessly to deliver critical medical interventions, establish emergency response units, and support the resilience of local healthcare providers. We have deployed specialized medical teams, expanded essential services, and ensured access to quality healthcare for thousands of vulnerable individuals.

Our organization has also continued to grow, strengthening our partnerships with international agencies, governments, and local institutions. Through collaborative efforts, we have been able to mobilize resources swiftly and implement innovative solutions that address the immediate and long-term medical needs of affected populations.

None of this would have been possible without the generosity of our donors, the dedication of our staff, volunteers, and the expertise of our board and advisory committee. Your support has been the backbone of our operations, and we remain committed to upholding the highest standards of transparency, accountability, and impact in everything we do.

As we move forward, our focus remains on expanding our emergency response capacity, enhancing medical training and capacity-building programs, and advocating for sustainable healthcare solutions in crisis zones. We will continue working relentlessly to ensure that no life is left behind in times of crisis.

On behalf of the entire UOSSM Canada team, I extend my heartfelt appreciation for your trust and commitment to our cause. May Allah SWT bless you all and grant us the strength to continue serving those in need with excellence and compassion.

Jazakoum Allah Khayran,

A handwritten signature in blue ink that reads "Dr. Husam Al Fakir".

Dr. Husam Al Fakir
Chair, UOSSM Canada

ABOUT UOSSM CANADA

UOSSM Canada (Union of Medical Care and Relief Organizations-Canada) is a registered charitable organization dedicated to humanitarian relief efforts. Established in 2016, UOSSM Canada operates independently and is non-political and non-sectarian. Our organization was founded by healthcare professionals with a shared commitment to providing life-saving medical assistance and access to quality healthcare and mental health services to those most in need, regardless of nationality, ethnicity, gender, religion, or political affiliation.

As an affiliate of International Union des Organisations de Secours et Soins Médicaux (UOSSM-International), UOSSM Canada collaborates with UOSSM offices based in various countries, including the United States, England, Switzerland, Turkey, and France. This strategic alliance enables us to pool resources, coordinate efforts, and develop joint programming to maximize the impact and quality of healthcare services provided to affected populations.

UOSSM Canada prioritizes healthcare, capacity building, and mental health initiatives, spearheading innovative programs and strategic initiatives to tackle evolving health challenges in regions affected by crisis. Among our notable achievements is being at the forefront of using the Vacuum Assisted Closure (VAC) device for wound care in areas lacking consistent access to electricity, such as Gaza, Syria and other crisis-affected regions. This pioneering approach allows for effective wound treatment without reliance on electricity, ensuring accessibility to critical healthcare services in resource-constrained settings.

At UOSSM Canada, we remain committed to our mission of providing hope, healing, care and resilience to those facing adversity. We achieve this through our strategic partnerships, innovative initiatives, and dedicated team of professionals, we strive to make a positive and lasting impact on the lives of individuals and communities in need.

VISION

At UOSSM Canada, our vision is to create a world where every individual has access to equitable and quality healthcare, regardless of their circumstances. We envision empowered communities thriving in good health and well-being, with health disparities eradicated.

MISSION

Our mission at UOSSM Canada is to provide comprehensive medical relief and humanitarian aid to vulnerable populations affected by conflict, disaster, and poverty. We are dedicated to delivering life-saving healthcare services, emergency response interventions, and capacity-building initiatives to empower communities and restore hope in times of crisis.

CORE VALUES

Our core values serve as the foundation of everything we do:

ACCOUNTABILITY: We recognize our moral duty and responsibility to use our resources efficiently to achieve measurable results. As such, we are transparent and accountable to our sup; porters, partners, and above all, the people.

INTEGRITY: We take good care of the resources with which we are entrusted and strive to the highest standards of personal honesty, ethical behavior, and fairness in everything we do. We lead by example and always act in the best interest of the people.

NEUTRALITY: We commit to the medical ethics of neutrality and impartiality in our work for the people. We assist everyone in need irrespective of nationality, ethnicity, gender, religion or political affiliation.

TRUST: We respect each other and believe in essential human values. We value the trust we have accomplished in our relationships and we strive to continue doing our best to maintain this trust with the people.

AMBITION: We commit to provide the highest quality of care we are capable of, guided by our medical profession and the international principles and humanitarian standards.

PROJECTS & ACHIEVEMENTS

Thank you to the support of our donors
and the community partners of UOSSM-Canada.

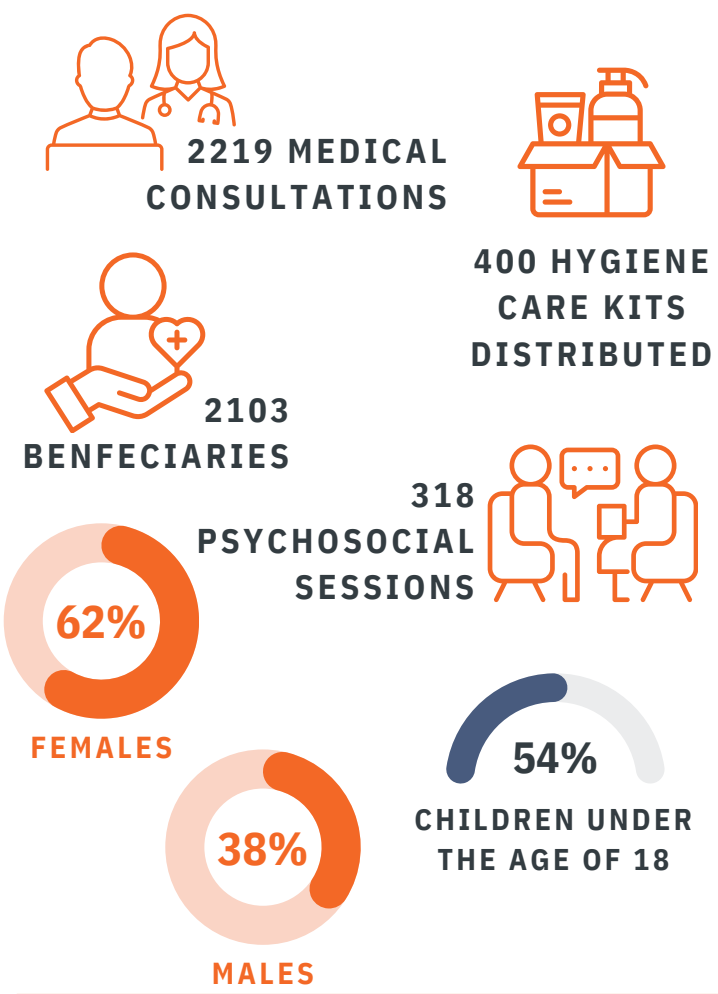

LEBANON MOBILE CLINIC

Project Overview

In 2024, amid the ongoing war in Lebanon, the healthcare system lacks the structural capacity to respond to crises, hindering healthcare workers’ ability to provide primary healthcare (PHC) service provision efficiently.

Through this project, UOSSM Canada is working to enhance healthy lives, promote resilience and well-being equally for the displaced Syrian and Lebanese populations within Lebanon. Our work is to improve access to acceptable, inclusive, and quality essential healthcare services; by providing primary healthcare in 11 temporary shelters for those most vulnerable and in need in the Bekaa region, affected by the Lebanese Israeli conflict.

The project is focused on offering medical care, performing preventive health practices, delivering Psychosocial Support Services (PSS), and referrals of specialized advanced cases.

Duration: 3 months

3-Month Reach: The target is to reach a total of 5,766 beneficiaries, divided as follows; 3,230 medical consultations, 250 beneficiaries of Psychosocial Support Services (PSS) per month, 1,650 beneficiaries of awareness-raising sessions, and 636 beneficiaries receiving hygiene and personal care kits.

Realized 2-month target: This project started in November 2024, and has since then provided 2,219 medical consultations for 2,103 patients, 62% of whom are female, 318 PSS sessions, and 400 beneficiaries received hygiene and personal care kits.

SUCCESS STORIES

Almasa's Remarkable Story of Resilience and Hope!

At first, Almasa was hesitant to engage with the shelter's support services, overwhelmed by her own struggles, and fearing the unknown. She initially declined group sessions but began to trust the staff as she spent more time in the shelter. Slowly, she opened up about her emotional challenges—fatigue, sadness, and worry about her husband's health condition. The team listened and took action, they reassured her, and connected her with medical services for her husband; which helped ease some of her anxiety.

Encouraged by their support, she started to join the group sessions, there she found strength in the shared experiences of others. Over time, she became more involved, volunteering in the kitchen and participating more actively in sessions. The team's care and guidance transformed her, and with her husband's surgery successfully arranged, her sense of hope, relief and confidence grew.

Today, she is a thriving, inspiring part of the shelter community, using her journey to encourage others, and her mental health has improved significantly. Her story is a testament to the power of trust, support, and resilience.

"WHEN WE ARRIVED HERE, I FELT COMPLETELY LOST. I COULDN'T EAT, I COULDN'T SLEEP, AND I DIDN'T WANT TO TALK TO ANYONE. MY HUSBAND NEEDED SURGERY, AND I WAS SO SCARED BECAUSE I DIDN'T KNOW WHERE TO START OR WHO TO TRUST."

-ALMASA

"THIS PLACE HAS CHANGED MY LIFE. THE SUPPORT SESSIONS HELPED ME FIND STRENGTH I DIDN'T KNOW I HAD."

-ALMASA

SUCCESS STORIES

Ahmad's Inspiring Journey to Health and Happiness!

Ahmad, a child at the FFC shelter, faced a life-changing accident that left him fully paralyzed. Initially, he withdrew from activities, worried about how others would perceive his wheelchair and condition. The protection team recognized the need to rebuild his self-confidence and educate the other children. With patience, they encouraged Ahmad to participate in activities at his own pace while also engaging his parents to support his emotional growth.

They organized awareness sessions for the other children to foster understanding and inclusion. Over time, Ahmad began to join in, and the children, now more empathetic, welcomed him into their games.

Today, Ahmad is an active and integral part of the shelter community, and his journey highlights the power of inclusion and support in helping children overcome challenges.

"AFTER THE ACCIDENT, AHMAD WAS COMPLETELY ISOLATED. HE WAS AFRAID TO FACE OTHER CHILDREN AND FELT DIFFERENT BECAUSE OF HIS WHEELCHAIR. IT BROKE OUR HEARTS BECAUSE WE DIDN'T KNOW HOW TO HELP HIM."

-AHMAD'S PARENTS

"NOW I FEEL LIKE I'M JUST LIKE EVERYONE ELSE. THE KIDS PLAY WITH ME, AND I ENJOY ALL THE ACTIVITIES. THE TEAM HELPED ME SEE THAT I CAN STILL HAVE FUN AND BE PART OF THE GROUP."

-AHMAD

LIBYA SPECIALIZED CLINICS

Project Overview

In response to the devastating situation in northeastern Libya following Storm Daniel a critical humanitarian intervention has been launched to provide urgent healthcare support to the affected population, particularly in the eastern region of Libya's communities.

Through this project, UOSSM Canada aims to improve healthcare services for the flood-affected population in Derna and surrounding areas.

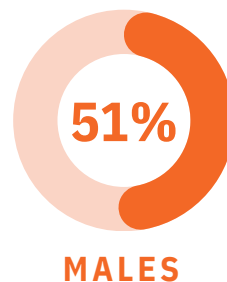

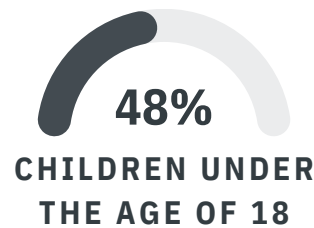

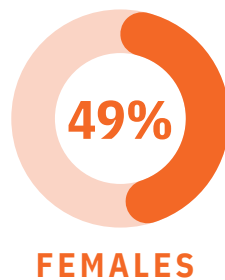

The project is to support a Primary Health Center by deployment of healthcare providers specialized in Trauma & Orthopedics, Diagnostic Radiology, and Ophthalmology. Additionally, medication and baby formula has been provided addressing the immediate healthcare needs of vulnerable individuals impacted by the floods.

Duration: 3 months

3-Month Reach: The targeted reach is 1500 beneficiaries.

Realized 2 month target: The project started in November 2024, and has since provided 2,952 medical services, supporting 1,006 patients; with 49% female, 51% male, and 48% children under the age of 18.

LIBYA SPECIALIZED CLINICS

Mohamed's Recovery Story!

After surviving Hurricane Daniel, Mohamed injured his knee while clearing debris, leading to severe osteoarthritis and crippling pain. The injury affected his mobility and made it difficult to work, deepening his financial struggles. With no means to afford private treatment, he feared his condition would worsen.

Then, a mobile medical team arrived, offering free care. Mohamed received a timely diagnosis and began treatment, including medication and physiotherapy. With follow-up care, he regained strength, mobility, and the ability to work again. Today, Mohamed walks without pain and is able to support his family once more, while continuing his medical progress.

"THE PAIN IN MY KNEE WAS UNBEARABLE. I COULD BARELY WALK, AND I HAD NO MONEY FOR TREATMENT, BUT I WAS AFRAID MY CONDITION WOULD GET WORSE." -MOHAMED

Fatima's Story, A Better Vision!

Fatima lost her husband and home during Hurricane Daniel, forcing her to live with relatives in overcrowded conditions. Her deteriorating vision due to cataracts made daily tasks nearly impossible, leaving her dependent on others. With no savings and limited access to healthcare, she struggled to find a solution.

When the mobile medical team diagnosed her cataracts, she was quickly referred for free surgery. After the procedure, Fatima regained her vision and a sense of control over her life. She now performs daily activities without assistance and feels empowered to face the challenges of post-disaster recovery.

"AFTER THE FREE SURGERY, I CAN SEE WELL AGAIN, AND THIS HAS GIVEN ME THE STRENGTH TO CONTINUE WITH MY LIFE DESPITE EVERYTHING I HAVE LOST." -FATIMA

MOROCCO MOBILE CLINIC

Project Overview

The 6.8 magnitude earthquake that struck central Morocco on September 8, 2023. The earthquake caused severe destruction in the High Atlas Mountains and rural areas south of Marrakech, such as Al Haouz province, areas which had occasional access to healthcare and no medical facilities in over 20 years until the earthquake; highlighting the urgent need for healthcare services and unit. Many buildings were destroyed, including homes made of mud bricks, leaving communities in dire need of medical assistance and humanitarian aid.

In response to this crisis, UOSSM Canada sought out to alleviate the humanitarian suffering of Moroccans in those areas that had occasional access to healthcare and no medical facilities at the time. The project has provided access to life-saving and equitable healthcare, ensuring that assistance is well-coordinated and directed towards the most vulnerable populations in need of vital support. UOSSM Canada is contributing to the delivery of health services by operating a Primary Health Care (PHC) center in Aghbar village and Al Haouz province near Marrakech.

The PHC center provides essential PHC services, both curative and preventive as follows:

- Reproductive Health services
- Child Health services
- Communicable Diseases (CDs) & Non-communicable diseases (NCDs) services for prevention
- Early diagnosis
- Management and treatment of various diseases

Duration: 8 months

(2 month preparation and 6 months operation)

8-Month Reach: Enhanced Primary Health Care in affected communities in Morocco through training 6 health care service providers on infection prevention and control protocol, and expected to provide 4,800 medical consultations.

Realized target: After 2 months of preparation, the operations started near the end of October, approximately providing 1,772 medical consultations and serving 1,307 beneficiaries; 69% of them are female and 31% are males, 45% of them were children between the age of 5 to 18.

MOROCCO MOBILE CLINIC

Omar's Story of Strength and Relief!

Omar had been enduring dizziness for a long time, significantly impacting his quality of life. With no understanding of his condition and unable to afford the lengthy and costly journey to the nearest city for medical attention, he felt trapped in his suffering.

When the health center was established in his area, it transformed his life. After being welcomed and treated by the caring staff, Omar was diagnosed with hypertension. The timely diagnosis and treatment not only resolved his dizziness but also prevented the condition from developing into a severe health crisis that could have threatened his life.

With free medications and regular check-ups offered by the center, Omar feels confident in managing his health. "I feel good now and visit the center from time to time to make sure my health is stable," he shared. This initiative has not only improved his health but also restored his confidence and sense of well-being.

**"NOT EVERYONE CAN GO TO THE
HOSPITAL IN BERHIL OR
TAROUDANT BECAUSE OF POVERTY.
I WASN'T ABLE TO GET A
CONSULTATION, SO I SUFFERED
FOR A LONG TIME."**

-OMAR

**"I'M NOT THE ONLY ONE WHO IS HAPPY ABOUT
THIS CENTER. I CAN SEE THE HAPPINESS IN
EVERYONE'S EYES. WE ARE NO LONGER
WORRIED ABOUT OUR HEALTH CARE."**

-OMAR

MOROCCO MOBILE CLINIC

Mohamed's Story of Relief and Care!

Mohamed's hearing problem had been a source of distress for years, affecting both his personal and professional life. The significant distance to the nearest hospital made it impossible for him to seek treatment, leaving him to adapt to his condition and resign himself to a life of limited communication and opportunity.

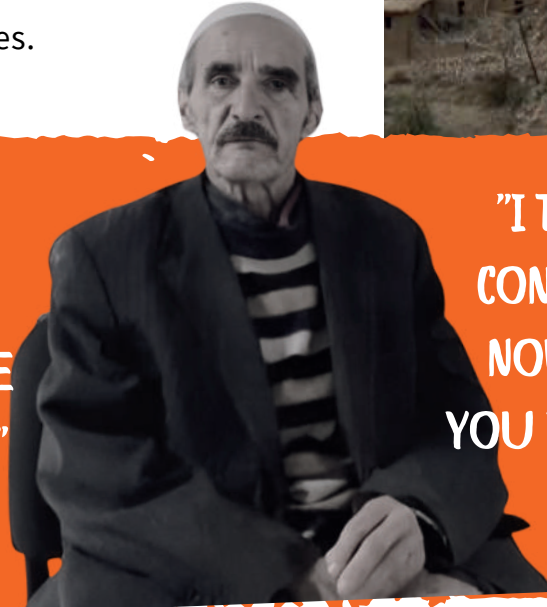

Upon learning about the new health center in his area, Mohamed decided to give it a try. To his surprise, the solution was simple—a routine ear-washing procedure resolved his hearing issues. The center not only restored his hearing but also raised his awareness of the importance of seeking medical attention early, even for minor issues.

"The accessibility of the center has changed everything for us," he said. "I didn't expect the result, but I'm so happy now." With his hearing restored, Mohamed can fully engage with his clients and enjoy life once more.

"I SUFFERED IN
SILENCE; I HAD NO
CHOICE BUT TO LIVE
WITH MY PROBLEM."

-MOHAMED

"I THOUGHT I WOULD HAVE TO
CONTINUE MY LIFE LIKE THIS, BUT
NOW I AM LIVING A NORMAL LIFE.
YOU DON'T KNOW HOW HAPPY I AM."

-MOHAMED

GAZA WOUND CARE

Project Overview

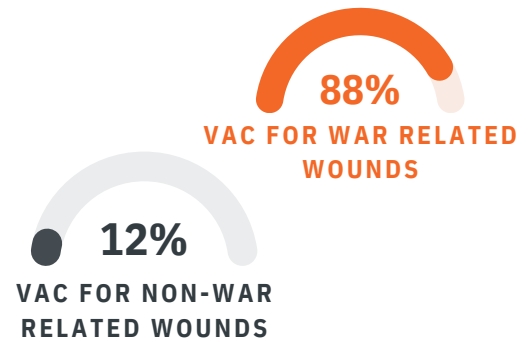

As of the 23rd of February 2024, Israeli airstrikes and shelling targeted Gaza including residential buildings, health facilities; more than 378 attacks on health care, 12 of the hospitals are currently partially functioning and 61 of the primary health care facilities are not functioning. Large-scale fatalities and casualties were reported exceeding 29,410 fatalities and 69,465 injuries of which approximately 50% are children and women.

UOSSM Canada is providing specialized wound care devices and services to reduce health-related morbidities and mortalities in the Gaza Strip, where most deaths and amputations are caused by wounds and infections. By enhancing the accessibility to quality wound care healthcare services for those most vulnerable and in need in Deir El Balah, and Khan Yunus, and North Gaza governorates through procurement of medical supplies, consumables and the Vacuum-Assisted Closure (VAC) devices which do not require any electricity, saving many from infection and amputations. Alongside these medical equipment and supply, UOSSM Canada is supporting with providing comprehensive healthcare services such as:

- Specialized wound care
- Surgical Interventions
- Expanding Healthcare Access
- Capacity Building of Healthcare Providers

Duration: 6 months

6-Month Reach: Procuring 1,000 VAC devices, and medical supplies/consumables. Installing 550 VAC devices and providing 5,000 medical consultations.

Realized 8-month target:

- Procured 1,000 VAC devices, and medical supplies/consumables for over \$900K CAD.
- Provided 273 VAC services for 144 patients while installing 144 VAC devices.
- 7,232 medical consultations and services to beneficiaries of whom 32% are females and 68% are males; 718 Surgical operations were provided.
- 46 Healthcare providers, including nurses and doctors, underwent training on the use of VAC devices and advanced wound care.
- Organized 2 Medical days reaching over 150 displaced individuals and delivering 205 services, offering them vital healthcare that they otherwise could not have received.

SUCCESS STORIES

Raghad's Remarkable Strength and Wound Recovery!

Raghad Abu Salem, suffered a severe injury to her foot caused by a rocket strike. The injury resulted in deep wounds on the lower part of her foot, which required immediate medical attention. However, the ongoing conflict and challenges in accessing healthcare left Raghad facing significant barriers to proper treatment. For weeks, she had to endure repeated dressing changes without any improvement, while her family struggled with the costs of transportation to the hospital and the shortage of essential medical supplies.

A medical team reached out to Raghad and arranged for the installation of a VAC device, which was used for three treatment sessions. This device helped promote wound healing and with each session, the wound began to close. After significant progress was made, Raghad was referred to the plastic surgery department, where a skin graft was performed to fully close the wound.

The timely intervention greatly improved Raghad's condition reduced her pain and restored her mobility. It also alleviated the financial burden on her family by minimizing the need for repeated hospital visits and reducing the costs associated with ongoing dressing changes and medical supplies.

"THE MEDICAL TEAM CONTACTED ME AND INSTALLED A DEVICE FOR MY INJURY. AFTER THREE SESSIONS, I NOTICED SIGNIFICANT IMPROVEMENT IN MY WOUND. THE WOUND WAS CLOSED BY A DOCTOR AND A PLASTIC SURGEON. THANK GOD FOR THIS PROGRESS." -RAGHAD

SUCCESS STORIES

Adel's Recovery Story!

Adel Sikkek sustained a deep wound below the knee. The injury required specialized care that was initially unavailable. The prolonged dressing changes failed to yield improvement and the lack of medical supplies and proper follow-up led to recurrent infections.

Upon intervention by the project team, Adel underwent two VAC therapy sessions that resulted in marked improvement in the wound's condition. He was then referred to the plastic surgery department, where a skin graft was successfully performed, closing the wound and significantly accelerating his recovery. This comprehensive care not only mitigated the risk of further infections but also improved his overall quality of life.

"THE MEDICAL TEAM FROM UOSSM REACHED OUT TO ME AND APPLIED THE VAC DEVICE. AFTER JUST TWO SESSIONS, I SAW SIGNIFICANT IMPROVEMENT IN THE WOUND. I WAS REFERRED TO THE PLASTIC SURGERY DEPARTMENT, WHERE A SKIN GRAFT SUCCESSFULLY CLOSED THE WOUND. I'M DEEPLY GRATEFUL FOR THIS INTERVENTION AND THE CARE I RECEIVED."

-ADEL

Cesar's Story, A Child's Wound and Strength!

Cesar Abu Aoukal, a 9-year-old boy, suffered a life-altering injury when shrapnel pierced his lower foot, creating a deep wound that required urgent care. However, due to the challenges of war, his family struggled to access medical treatment. After two weeks of ineffective dressing changes, the risk of amputation became a serious concern.

With the support of the project, Cesar received a multi-stage treatment plan. A Vacuum-Assisted Closure (VAC) device helped reduce the wound size, followed by an external fixation device to stabilize it. In the final stage, a skin graft closed the wound completely. This comprehensive treatment saved his foot, restored his mobility, and gave him hope for the future.

"I WAS HIT BY SEVERAL SHRAPNEL PIÈCES, ONE OF WHICH STRUCK MY LOWER FOOT. I SUFFERED GREATLY FROM THIS INJURY DUE TO THE LARGE SIZE OF THE WOUND AND THE MEDICAL STAFF'S INABILITY TO CLOSE IT. I UNDERWENT DRESSING CHANGES FOR MORE THAN TWO WEEKS WITH NO RESULTS OR IMPROVEMENT. ON TOP OF THAT, THERE WAS A SHORTAGE OF MEDICATIONS AND DRESSINGS AND SOME DOCTORS TOLD ME THAT MY FOOT MIGHT BE AMPUTATED."

-CESAR

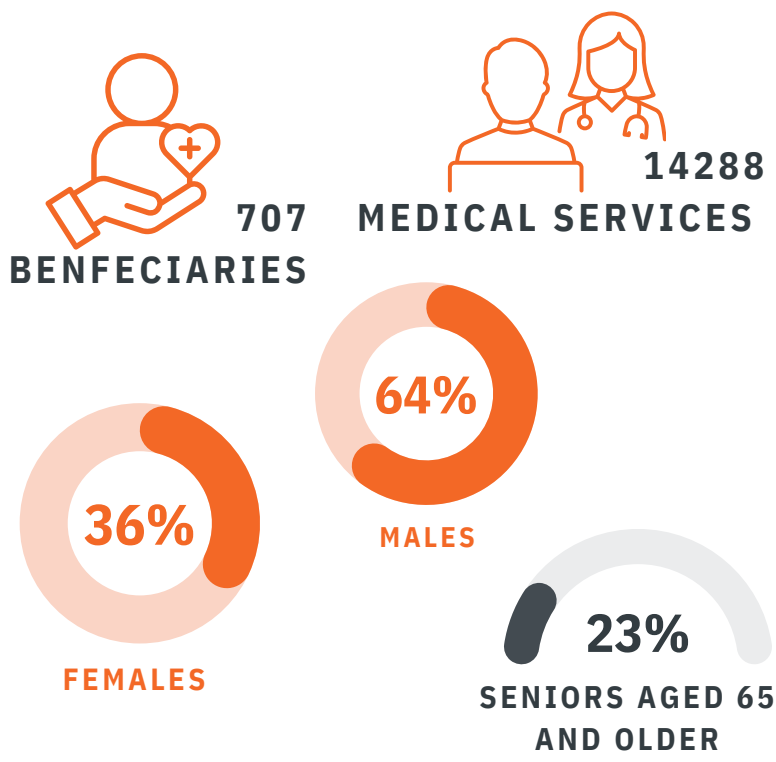

NASSER SPECIALIZED CLINIC: SOUTH GAZA

Project Overview

South Gaza, a region heavily affected by ongoing conflict grappling with a severe humanitarian crisis, faces significant challenges in delivering adequate healthcare services. The prolonged humanitarian crisis has exacerbated existing vulnerabilities, straining the local health infrastructure and overwhelming the capacity of medical facilities.

Through this project, UOSSM Canada is working to enhance healthcare services in South Gaza, especially management of acute and non-acute medical conditions for civilians in the Gaza Strip who are affected by diabetic complications, and war injuries.

The project is achieved through the operation of a specialized clinic offering Outpatient Clinics and Minor Surgical Unit (MSU) focused on vascular care, wound care, and endocrinology, Inpatient unit, physiotherapy services focusing on rehabilitation, mobility enhancement, pain relief, home visits care and capacity building for the health care providers in Southern Gaza.

Duration: 6 months

6-Month Reach: The target reach is 24,150 medical services provided to 2,574 patients.

Realized 2 Months target: The project started in November 2024 providing 14,288 medical services benefiting 707 patients of whom 64% are male, 36% female, and 23% were 65 years and older.

SUCCESS STORIES

Nujoud's Story of Care and Relief!

On November 29, 2024, Nujoud sought care at the Diabetic Care Clinic at Nasser Medical Complex, presenting with a diabetic wound located below her right knee.

Her vital signs were recorded upon arrival, and blood glucose levels were tested. Laboratory analysis of her complete blood count (CBC) indicated severe anemia, with a hemoglobin level of 7.1 g/dL. The clinic's medical team promptly administered two units of blood to stabilize her condition. Subsequently, Nujoud was admitted to the clinic for wound care and preparation for a surgical procedure.

During her stay, Nujoud benefited from a multidisciplinary approach that included regular blood testing, consistent medical evaluations, and routine wound dressings. This holistic care significantly contrasted with her prior experiences, where overcrowded hospitals lacked the capacity to provide her with the necessary admission and care

"I FEEL SATISFIED HERE BECAUSE OF REGULAR BLOOD TESTING, REGULAR DOCTOR ROUNDS, AND REGULAR DRESSINGS. I HOPE THEY CONTINUE PROVIDING DIABETIC FOOT SERVICES HERE AND EXPAND THEM IN THE FUTURE."

-NUJOUD

SUCCESS STORIES

Ghassan's Relief and Happiness!

Ghassan has been living with diabetes and hypertension since 2010, which requires continuous management through medication and regular medical check-ups. In 2022, he underwent the amputation of three toes due to complications from his diabetes. This led to the need for specialized care, including frequent wound dressing and medication to prevent further infection.

Prior to the project's intervention, Ghassan faced a lack of essential medical resources, including the unavailability of proper wound care and medications and the absence of clean environments to conduct dressing changes. This was exacerbated by the closure of nearby clinics, which left him without reliable access to healthcare. The project addressed these gaps by setting up a facility that provided daily wound cleaning, proper dressing changes and access to essential medications. The medical team's attention and the provision of a sterile and well-maintained environment contributed to Ghassan's recovery, improving both his physical and mental well-being.

"SINCE THE PROJECT STARTED, MY WOUNDS HAVE BEEN CLEANED AND DRESSED PROPERLY EVERY DAY. THE DOCTORS CHECK ON ME REGULARLY AND THE MEDICATIONS I NEED ARE ALWAYS AVAILABLE. I FEEL CARED FOR AND THE CLEANLINESS OF THE ENVIRONMENT HAS MADE A HUGE DIFFERENCE IN MY RECOVERY."

-GHASSAN

GAZA MENTAL HEALTH & PSYCHOSOCIAL SERVICES (MHPSS)

Project Overview

No doubt armed conflicts and natural disasters cause significant psychological and social suffering to affected populations. The psychological and social impacts of emergencies may be acute in the short term, but they can also undermine the long-term mental health and psychosocial well-being of the affected population. UOSSM Canada seeks to contribute to mitigating the impact of the war crisis on the most affected populations in Rafah Governate and South Gaza by improving their well-being and resilience.

The project supports to improve access to specialized mental health services for war-affected individuals, including children, youth and adults, through key interventions such as:

- Psychotherapeutic Services (individual and group therapy sessions)
- Awareness and Education (group sessions)
- Social Emotional Learning (SEL) program)
- Parenting Skills Program (support parents and caregivers)
- Referral Services
- Capacity Building for healthcare providers.

Duration: 12 months

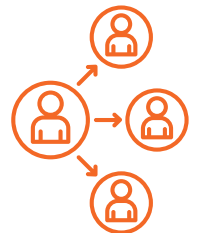

12-Month Reach: The target reach is 11,650 direct beneficiaries, and

Realized 7-month target: This project started in June 2024, providing a total of 9,213 psychosocial services; with 72% being females, 28% being males, and 62% of them are children and youth under the age of 18. Providing 7,446 Mental Health awareness and Psychosocial sessions; and 1,747 capacity building and case referrals.

Fathiya's Inspiring Path to Inner Peace!

Fathiya, a 14-year-old girl, faced a severe psychological crisis after surviving a bombing that caused her house to collapse while she was inside. She sustained injuries and experienced the fear and trauma of being buried under the rubble with her family. This harrowing experience led to symptoms of psychological trauma, including sleep and eating disorders and withdrawal from social interaction.

Through a comprehensive psychosocial support program, we provided Fathiya with a safe space to express her feelings.

The sessions incorporated relaxation techniques, free drawing, and group activities to strengthen her social connections. Over time, Fathiya showed gradual improvement in her psychological state, which boosted her confidence and her ability to adapt to her surroundings.

"THE SUPPORT SESSIONS HELPED ME EXPRESS
MY FEELINGS AND RECONNECT WITH OTHERS. I
FEEL HOPEFUL ABOUT MY FUTURE."

-FATHIYA

SUCCESS STORIES

W.A Remarkable Journey to Happiness!

W.A, a 42-year-old widow residing in an UNRWA shelter in Khan Younis, faced tremendous challenges after losing her husband in July. He was killed in front of her eyes, leaving her to raise five young daughters alone. In addition to the emotional and financial burden, she faced pressure from her late husband's family, who wanted to take her daughters away from her. However, W.A demonstrated immense psychological resilience by standing her ground and refusing to be separated from her daughters.

Throughout the intervention, I established a trusting relationship with W.A, which allowed her to open up and engage in the activities provided. She discovered a passion for drawing, which became an essential outlet for her emotions. She began participating in various therapeutic activities, including relaxation and deep breathing exercises, which helped alleviate her psychological stress. As a result of the intervention, W.A, became more active, engaged, and optimistic about the future. Her psychological and social well-being improved significantly, and she developed a stronger sense of resilience.

**"I AM SO HAPPY AND RELIEVED TO HAVE MET YOU.
I LOOK FORWARD TO YOUR VISITS BECAUSE THEY
BRING ME COMFORT AND JOY."**

-W.A

GAZA DIALYSIS: RE-SUPPLYING THE NASSER MEDICAL COMPLEX

Project Overview

The Gaza Strip has been experiencing extensive destruction in all aspects of life since October 7th, leaving it extremely devastated. The WHO has recorded attacks on healthcare facilities, causing the death and injury of healthcare workers and severe damage to hospitals and ambulances. Dialysis sessions have been reduced to a level deemed "insufficient from a therapeutic standpoint," further worsening the chronic health conditions of patients in need of this critical treatment.

This project aims to provide life-saving medical devices and supplies in response to the severe shortage at the Hind Deghma Dialysis Center in Nasser Medical Complex. These essential devices are critically needed by hospitals across the sector. UOSSM Canada seeks to improve conditions for kidney failure patients in the Gaza Strip by ensuring the dialysis center operates with the necessary equipment and resources.

Duration: 3 months

3-Month Reach: Supplying Nasser Medical Complex with 33 Dialysis Machines, expecting to reach 400 patients per month, with each patient receiving 12 sessions per month, resulting in an estimated 4800 sessions per month over 6 months.

**33
DIALYSIS
MACHINES**

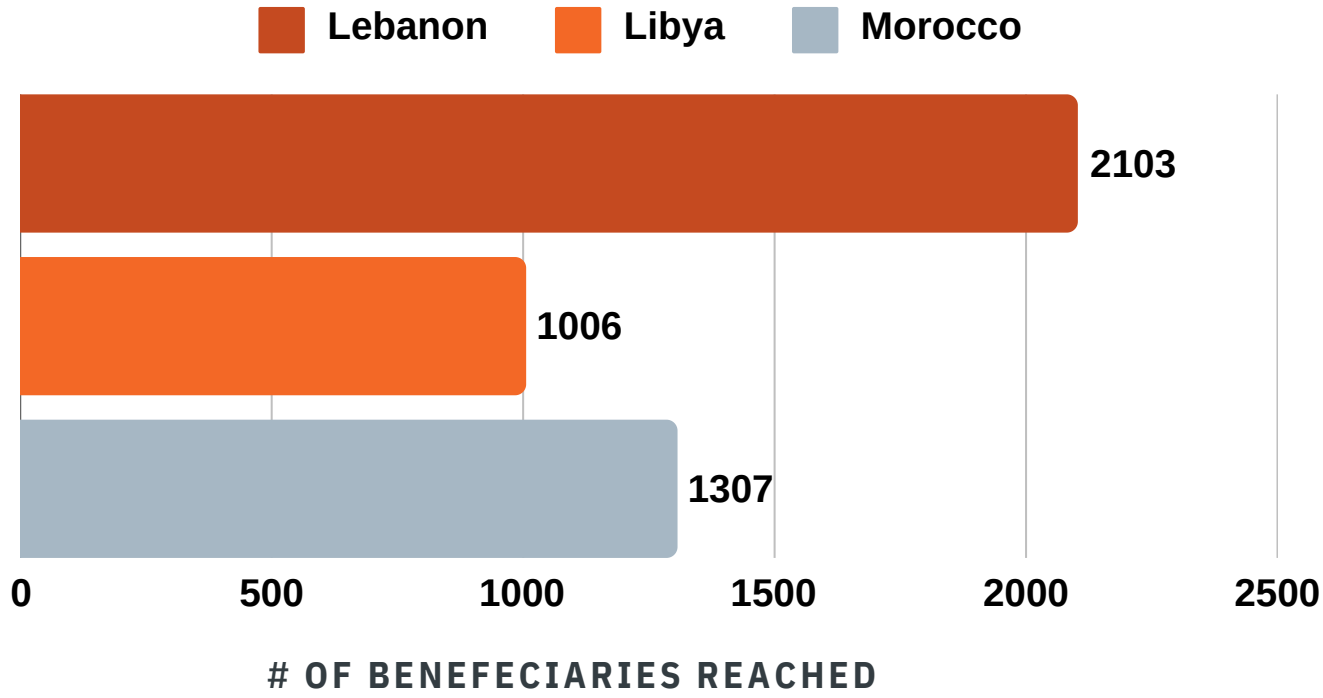

**4800
DIALYSIS SESSIONS
PER MONTH**

Realized target: Safely delivered 33 dialysis machines to Nasser Medical Complex, delivery was completed over 2 shipments; completed by the beginning of December 2024.

Union of Medical Care and Relief Organizations-Canada

Notes to the Financial Statement

For the year ended December 31, 2024

(Unaudited- see Compilation Engagement Report)

(Canadian dollars)

1. Basis of Accounting:

The basis of accounting applied in the preparation of the balance sheet as at December 31, 2024 and the income statement for the year then ended is on the historical cost basis, reflecting cash transactions with the addition of:

- Capital assets amortized in accordance with the amounts allowable for income tax purposes.
- Accounts receivable.
- Accounts payable and accrued liabilities.
- Current income taxes payable as at the reporting date.

THANK YOU FROM OUR UOSSM CANADA FAMILY TO YOURS

As we reflect on another year of growth and impact, we extend our heartfelt gratitude to you; our dedicated supporters, partners, and advocates. By the blessings of Allah SWT and through your unwavering commitment, we have been able to reach those in dire need, providing lifesaving medical care and essential support to vulnerable communities.

Your generosity and steadfast belief in our mission empower us to navigate challenges, overcome obstacles, and continue serving and saving lives. From the bottom of our hearts, we thank you. With your continued support, we will persist in our efforts, ensuring that hope and healing reach those who need it most.

With gratitude,

The UOSSM Canada Family
