

Voices of Malvern

Independent campaign for Malvern – have your say

What has happened since the first Newsletter:

- Work is continuing on a corporate structure, incorporation processes, job descriptions and campaigning skills.
- Several Committee members attended a Voices of Chisholm gathering and established valuable contacts in the areas of IT and campaigning materials. They also established contact with the fledgling Voices of Ashwood project.
- We noticed that Liberal Malvern candidate Amelia Hamer is already campaigning in the community and making herself known to various sporting and community groups.

Latest Committee Decisions

- A newsletter will be issued after each Committee meeting to keep you informed of our progress.
- On-the-ground actions are starting this month! We decided to start street-corner chats with the Malvern community about State issues that they feel should be addressed and **we need your help!** (see 'Over to You' below).
- We took a position on supporting an increase in public housing by State and Federal Governments and are seeking your feedback.
- We decided to help Voices of Chisholm drop its newspaper in cafés and meeting places located in the Malvern part of this Federal electorate.

Over to you!

- Tell us what you feel are the issues that concern you the most
- The Voices of Malvern need a logo! This is an appeal to our creative friends to suggest ideas!
- Our first Street Corner Chats will take place on **Saturday 18th April**. Teams of two will ask members of the community about issues they feel should be addressed by our next State Government. **Can you help?** Please contact Christina Zigouras 0422 922 407 or christinazigouras@gmail.com before April 15th.

Topics we want to hear more about, directly from you:

- How can we recruit volunteers and supporters?
- How should the Committee communicate with everyone involved?
- Ideas for fundraising?
- How shall we keep our people involved and motivated?
- Any specific groups of people that we should approach, and how?
- How can we identify and attract the best candidates?

Thank you for your interest and support.
