

I am writing to state my objection to the change in rules for how librarians are assigned to school districts. I think the proposed change is as bad an idea as bad ideas get. It will greatly affect the students in our district in a negative way. Our current number of librarians are able to provide so many essential services and opportunities for our students that would not be available if the number of librarians were to be reduced.

Please do NOT reduce the number of librarians in our school! Librarians should be assigned to every school according to the numbers of students in the school, NOT assigned to the district at large.
