

Empowered Moms, Healthy Kids

A National Coalition of Unstoppable Moms

To the EPA Pesticide Division:

Moms Across America and our supporters: retail brands, pediatricians, scientists, physicians, health coaches, teachers, farmers, lawyers, and consumers, are requesting that you review the [67 studies that were not included](#) in your review of glyphosate as a carcinogen that the International Agency for Research on Cancer (IARC) reviewed and revise your decision regarding the license of glyphosate. We request you also review the new studies connecting glyphosate to many reproductive and endocrine-disrupting issues. [Hundreds of independent studies](#) have shown that glyphosate is harmful in many ways, not only as a carcinogen. Glyphosate also has endocrine disrupting properties at very low levels and can cause neurological, nervous system, reproductive, sperm, liver, kidney, and organ damage as well as miscarriages.

There is no safe level of glyphosate in our food or livestock feed supply, and you are the only agency that has the authority to change the current reality: harmful levels of glyphosate contaminate [school lunches](#), [fast food](#), [baby food](#), and [gluten-free food](#). In the past, [glyphosate has been detected](#) in thousands of food samples and other substances, including [oats, chickpeas, beans, wheat, soy, corn, orange juice, wine, beer, eggs, bread, snacks, cereals, honey, and even breastmilk, hospital gauze, feminine sanitary products, childhood vaccines, and sperm](#).

America has a physical, mental, and reproductive health crisis, and glyphosate is a significant contributing factor to all of these severely critical issues. Your agency must take action now to protect the health and future of our country.

We are asking you to:

- 1. Review all the studies the IARC reviewed and all new independent studies available today on glyphosate and all health effects.**
- 2. Revoke the license of glyphosate.**
- 3. Until the license is revoked, immediately disallow glyphosate from being used as a drying agent or pre-harvest weed killer on all agricultural crops. The EU has recently banned pre-harvest spray with glyphosate to minimize dietary exposure. We are asking you to do the same.**

Thank you for taking action to protect the American public's health, not the corporations' profits.

We hope you appreciate that when you reflect on your legacy one day, it will be one of courage, commitment, and integrity.

Thank you.

------------	----	----	-----------------------	-------------------------

Review all of the studies the IARC reviewed and all new independent studies available today on glyphosate and all health effects.
Revoke the license of glyphosate.
Until the license is revoked, immediately disallow glyphosate from being used as a drying agent or pre-harvest weed killer on all agricultural crops. The EU has recently banned pre-harvest spray with glyphosate to minimize dietary exposure. We are asking you to do the same.

These harmful chemicals are found in foods all across America including baby food. Please immediately ban pre-harvest spray with glyphosate and other agri chemicals and also ban the sale of them too.

We switched to Banza pasta after finding out that one of our daughter,Ãs needs to be gluten-free, but then she told us that she felt sick every time that she ate Banza pasta. We were perplexed why this might be the case and now wonder whether it is the glyphosate in the pasta, as she has been fine eating organic chickpeas. I also do not eat gluten, but wake up in the middle of the night with chills, feeling like my system is collapsing in on itself whenever I eat corn products, beef or chicken, but I am fine when I eat fish, organic tofu and vegetables. I can,Ãt help but wonder if it is the glyphosate in the corn products and animal feed that is causing the issue. Multiple studies have linked glyphosate use to human health issues and I can,Ãt help but wonder how many other people are experiencing symptoms like ours without knowing the cause or how to prevent them. Please ban glyphosate use on our crops.

Kathy Bee	WV	US	Our government needs to quit thinking of the big money; it needs to protect its citizens. Our future depends on our children; they need to stop poisoning the citizens and our planet. Other countries have banned this horrible chemical why can,Ã our country? Glyphosate makes us ill and then the drug companies make money from our illnesses caused from the use of chemicals. Then our lives are cut short and our quality of life suffers.	2024-08-21 18:32:15 UTC

Jen Nelson	MI	US	Glyphosate poisoned my daughter and she ended up in the hospital, with a collapsing lung, after a malicious neighbor used Round Up to poison my parent,Äôs garden because she thought it had weeds in it. My daughter was 4yrs old, and was eating cherry tomatoes out of it, unwashed (because it was an organic garden). It took nearly a week for the garden to turn brown, so we didn,Äôt know right away.	2024-08-25 14:06:13 UTC

Kristin Schoenborn	CA	US	I demand the EPA not only review all of the above papers at the request of moms across America but I demand that something be done about toxic chemicals being used in our food here in America, especially chemicals that have been banned in the EU. Start with glyphosate and then move on to banning others. I and we demand accountability from you in your regulatory decisions. Your policies affect our health and your health as you are also eating these foods and are likely facing the same health consequences from consuming these chemicals as the rest of us. I hold you accountable. So be accountable. Stand with people to ensure our health and ban glyphosate!	2024-08-25 22:29:05 UTC

Nicole Pajer	CA	US	As a new mom, it's absolutely terrifying to hear how many pesticides are on our food. I've been aware of this before but you're even more cautious of it when you're raising little humans. Even buying organic doesn't always protect from glyphosate. Organic hummus from Whole Foods tests sky high. Let's do better and ban this crap. Other countries are doing it. Let's act like we care about our citizens!	2024-08-26 20:07:34 UTC

Ariana Tanoos	IN	US	Please ban the use of this chemical. I have known too many couples with infertility, too many loved ones with cancer. Our country must stop allowing companies to place products on the market or to use in our industries ones that are potentially detrimental to human health. We must shift the burden to the companies/producers, NOT the consumers/public. It is immoral to place profit over the public,Â's health.	2024-08-31 01:04:31 UTC
Maria Polanco				2024-08-31 01:06:37 UTC
Jude Lopez	CA	US	i hate this country. why is it that Every monopolized or major company has to be publicly outed as poisoning the population?? money doesn't matter more than human lives but here we are with lead and other carcinogens in food and water, bpa and microplastics and toxins everywhere else. this is so stupid and all of it was avoidable.	2024-08-31 01:08:05 UTC

Hunter Kettering			It's industrial poison, and the people know it. It has caused me personally so much costly pain and spiritual harm too. I know legalities are devoid of natural law given industrialization, but can policy makers, corporate lobbyists, and other greed driven individuals in power truly forget they are killing innocent people alongside their own future generations too? Such shame and karma is in their hands. I recommend they clean up, and i support moms across America in their initiative today.	2024-08-31 01:27:32 UTC

Lusinda Duffy	FL	US	<p>America has a physical, mental, and reproductive health crisis, and glyphosate is a significant contributing factor to all of these severely critical issues. You must take action now to protect the health and future of our country.</p> <p>I am asking you to:</p> <p>Review all of the studies the IARC reviewed and all new independent studies available today on glyphosate and all health effects.</p> <p>Revoke the license of glyphosate.</p> <p>Until the license is revoked, immediately disallow glyphosate from being used as a drying agent or pre-harvest weed killer on all agricultural crops. The EU has recently banned pre-harvest spray with glyphosate to minimize dietary exposure. We are asking you to do the same.</p> <p>Thank you for taking action to protect the American public's health, not the corporations' profits.</p> <p>We hope you appreciate that when you reflect on your legacy one day, it will be one of courage, commitment, and integrity.</p> <p>Thank you.</p>	2024-09-02 16:39:07 UTC

Logan Daniels		US	this petition says it all. PLEASE help restore HEALTH to America!!!!!! We are poisoned at every turn.. clothing, furniture, yard products, food. It is insanity to keep approving more and more toxic chemicals and products in this country. Its insane what we find in our food and everything around us!! The bees are in serious peril .. when the bees are gone there is no food... oh except the lab grown food.. is that what this is about??? the Bill Gates et al who want to have a market on the fake food industry... WE NEED WARRIORS who will insist on policies etc that put the health of people first not the profits of the corporations. More chemicals sprayed on pests IS NOT THE SOLUTION... how bout we look to restorative farming practices etc.. WE DO NOT WANT OR NEED ALL these toxic chemicals!!	2024-09-03 17:55:35 UTC
Stephen Brumpton	ON	CA	Let's join the many countries in Europe that have banned the use of glyphosate. Because of glyphosate's continued use in the USA, it is a major contributing factor to why the USA has more kids with chronic diseases than all developed countries in the world.	2024-09-03 18:23:35 UTC

Janet FitzGerald		US	Please - we need to put the health of all citizens ahead of Big Industry's greed. Aside from that, people are loosing faith in our government bc of this issue. There's nothing more basic than the foods we eat, and the water we drink. it's time to stop the corruption that is eroding our democracy. All legislators and federal agency decision makers need to think if they are helping or hurting their own family and friends. They know the answer. Greed is blinding is the answer.	2024-09-08 19:56:29 UTC

Tamara Brennan	CO		The health crisis affecting our children should be the number one issue that your agency considers with approval of any and all toxic chemicals. The declining life expectancy, mental health crisis in young people, the chronic disease statistics, and the failure of our public agencies to protect us combined are a national disgrace in the global context. Unfortunately, educated Moms like us are unable to shield our children from the effect of policies that make these harmful substances unavoidable in the food supply of our nation. Your choices have direct consequences on the well being of our children, including whether or not they will be well enough one day to have children of their own. Current trends put that in doubt. I am not asking pretty please that you de-licence glyphosate. Perhaps you have not noticed that moms are a force of nature not to be taken lightly.	2024-09-09 20:23:43 UTC

Robin Toth		US		2024-09-11 00:40:27 UTC
Leslie Preston	NY	US	Glyphosate is a patented antibiotic. It kills bacteria. It kills bacteria in the soil. It kills bacteria in our bodies. Some bacteria in the soil is necessary for life itself. Some bacteria in our bodies is necessary for our life. Tons and tons of glyphosate is sprayed on our environment. Tons of glyphosate is sprayed on our crops and we ingest it. It is killing our soil. It is killing our microbiome. Common sense should tell you this needs to stop. There are safer options.	2024-09-11 02:24:49 UTC

Shannon Gainey	IL		This administration has been heavily restricting chemicals under both TSCA and FIFRA. Now is the time for them to finally regulate and ban glyphosate.	2024-09-12 14:13:43 UTC
Dr. Leo and Pat Holland	CA	US	Our country has worse and worse health outcomes because the media, government, politicians, and more prioritize monetary profits, fashion, & appearances, over health. So pollution, keeps accumulating. From our lack of precaution and poor priorities, we sow ever increasing pollution. Thus you and your loved ones, & we, and our loved ones reap: infertility, lower IQs, autism, genetic damage, mental illness, shortened and painful lives - asthma, anaphylaxis, cancer, arthritis, digestive problems, failing vital organs. Start prioritizing health. Exercise precaution, allowing no man made chemicals nor man altered life forms unless independent research can prove Absence of harm to humans and their offspring and Absence of harm to the environment for at least 3 human generations.	2024-09-12 14:13:48 UTC

Sarah Fletcher	WA		I thought that glyphosate was banned. Why on God's earth are you just approving it? All I can think is that there must be some money in it for you. Please just ban glyphosate, it shouldn't be that hard to do.	2024-09-12 14:27:10 UTC
Sharon Ledbetter	CA	US	Either you do your job and shut GMOs and all other man made chemical unnatural for the human body and other animals or your job will be gone. Do you know that migrating birds will not stop at a GMO field to eat when there is a non GMO field to stop and replenish their nutrients. Smart animals go to where the most and healthiest nourishment is. So prove you there in your fluffy position be as intelligent as the other animals, and take the responsibility to do the job your position was designed to do - keep poisons and unnatural to the living bodies of all species out of our consumption systems and the precious soil of our beautiful planet. 🌱🌿🍃🌾	2024-09-12 14:28:22 UTC
Connie Cavara	PA	US	Enough with the GMO. We want healthy, unadulterated food to feed our families. We are not lab rats for FDA to experiment on.	2024-09-12 14:30:04 UTC

Melissa Bushunow		US	Glyphosate is linked to developing cancers, celiac spruce, and gluten intolerance. It has been shown to disrupt GI function by interfering with the shikimate pathway of beneficial gut bacteria, and increasing the population pathogenic bacteria. It chelates minerals necessary for plant and human health. Glyphosate is a persistent herbicide -it doesn't dissipate. Revoke the glyphosate license. Ban glyphosate. Use agricultural vinegar for spot weed control. Let grains and legumes ripen and dry naturally.	2024-09-13 00:39:01 UTC
Mark Wyborny			Not biodegradable hormone disruption herbicide agents are killing ocean phytoplankton and cause a 5000 square mile Dead Zone in the Gulf. Starving coral reefs that eat phytoplankton. Killing atmospheric pseudomonas syringae the rain making microbe.	2024-09-13 00:53:22 UTC

Katharine Rausch	WA	US	My husband and I started a 5 acre homestead in 2005 in order to provide healthy eggs, milk and meat for our children. By 2008 our daughter could once again eat eggs when we mixed our own feed rations from organic grains and omitted soy and corn altogether.	2024-09-14 01:38:21 UTC
			At one point, we were waiting for the new crop of grain to be harvested, and purchased some conventional feed to tide our flock of ducks through until we could get the supplies for their normal feed. Within 2 days our daughter reacted to the eggs. I waited until 3 weeks after we had organic feed again, since I knew it typically takes 3 weeks for a substance that is eaten to completely clear the body. At that point she could again eat the eggs without getting a rash reaction.	
			With this, and additional evidence, we realized that it was the GMOs that came into the food chain just before I was pregnant with our daughter that she was reacting to. Even when GMO feeds were fed to animals, she could not eat the eggs or milk produced by those animals without reacting.	
			She is now 23, and still carefully manages her diet so that she can live an active and productive life.	
			It is vitally important for our children, our elderly, and everyone in our country that GMO wheat is not allowed in No GMOS
