

Americans Need Glyphosate-Free Food!

Consumers, Food and Beverage Brands, Doctors, Scientists, and Farmers Petition the EPA to Revoke the Use of Glyphosate as a Drying Agent or Pre-Harvest Weed Killer and Its Use on agricultural crops

Glyphosate Residues Detected in Food

21.73% Organic Foods - [Detox Project](#)¹
62.16% Grocery Store Foods - [Detox Project](#)¹
92.31% Hummus - [EWG](#)²
93.4% School Lunches - [MAA](#)³

95.6% Gluten Free Food - [MAA](#)⁴
100% Fast Food - [MAA](#)⁵
100% Cereals - [EWG](#)⁶
100 % Snacks - [Detox Project](#)⁷

Personal Care and Bodily Fluid

30% Breast milk samples - [MAA](#)⁸
57% Sperm in men - [Sky News](#)⁹
85% Feminine products - [Detox Project](#)¹⁰
87% Urine - [EWG](#)¹¹

93% Tap water - [Detox Project](#)¹²
100% Hospital Gauze - [Infobae](#)¹³
100% Childhood Vaccines - [MAA](#)¹⁴

Glyphosate has been shown to cause or contribute to the following conditions in animal and/or human studies:

- **Cancer**¹⁵
- **Endocrine disruption**¹⁶
- **Birth defects**¹⁷
- **Increased risk of miscarriage**¹⁸
- **Liver and kidney damage**¹⁹

- **Thyroid damage**²⁰
- **Increased risk of autism symptoms**²¹
- **Neurological damage**²²
- **Nervous system damage**²³
- **Sperm damage**²⁴

- ✓ We ask for the EPA to review the 67 studies the IARC reviewed on cancer.
- ✓ We ask for a re-assessment and for the EPA to revoke the license of glyphosate.
- ✓ Until the license is revoked we ask for an immediate ban on the use of glyphosate (and other harmful chemicals) as a drying agent or pre-harvest weedkiller. The health of the American public, pets, wildlife, soil, and future of our country is more important than the profits of the corporations.

Discontinuing the use of glyphosate as a drying agent or pre-harvest weedkiller, as the EU has done, reduces human exposure by 80%.
