

MOMS ACROSS AMERICA MOVEMENT

Championing policy and public servants that put children health, safety, and America's future FIRST.

STOP THE REPRODUCTIVE CRISIS

America's Future Is at Risk from Pesticides & Endocrine-Disrupting Chemicals

Fertility in Crisis

- U.S. fertility rate is **below replacement level (2.1)** — our population is headed toward societal collapse..
- **78% of pesticides banned in other countries** are proven to cause reproductive damage.
- **The other 22%?** Not tested enough to know.

The Worst Offenders

Top 5 pesticides still used in America (that are banned in other countries)

- **2,4-D** — linked to birth defects, organ damage, asthma
- **Atrazine** — causes reproductive organ changes, birth defects, cancer
- **Dicamba** — thyroid + reproductive damage, respiratory failure
- **Glyphosate** — carcinogen, increases miscarriage, infertility
- **Paraquat** — linked to Parkinson's, sperm damage, respiratory failure

Real-Life Impacts

- **Glyphosate detected in 55% of sperm samples** — linked to DNA damage & birth defects.
- Pesticides contaminate **breastmilk, sperm, umbilical cords, food, water, even vaccine, tampons & baby formula.**
- Metals in pesticides (lead, cadmium, mercury, arsenic) **disrupt hormones & damage fertility.**

National Security & Global Trade at Risk

- Fertility decline threatens **military readiness** and America's future workforce.
- U.S. exports are rejected by countries that have already banned these toxins.
- **86 pesticides that we allow are already banned abroad.** If these 86 were removed from use, farmers would still have **1,067 pesticides still available.**

Moms Across America Movement Calls for Action

- ➔ **Stop pesticide immunity shields that protect corporations, not families.**
- ➔ **Support non-toxic, regenerative farming and protect America's health, trade, and future.**

Take Action Today!

Say **NO** to pesticide immunity shields. Say **YES** to protecting fertility, children, and America's future.
